d. What are the direct services to be provided to citizens by the appropriations project?

City maintained water service

e. Who is the target population served by this project? How many individuals are expected to be served?

The citizens of DeFuniak Springs; >800.

f. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

There would be new commercial and residential developments, new mixed use developments and new industry created due to water service being provided along US 331 where it currently does not exist. The City would see an increase in tourism, and the construction of the project would provide immediate job opportunities for the entire area. Improved drinking water quality would be a result of the proposed project due to drinking water being treated at the treatment plant before distribution. New development successes would be measured by population growth, increased property value (tax revenue) and the creation of additional jobs in the area. Tourism success would be measured by an increase in services, such as food, lodging and retail facilities. The construction of this project would require utility crews, and landscape and irrigation workers to complete the project which would measure the success of immediate job opportunities. Water quality successes would be measured by having wat

g. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for in the contract?

The City will award the contract through a bid process. The bid documents will spell out liquidated damage costs for project overruns. The bid documents will also require the selected contractor to provide performance and payment bonds to the City.
