## Local Funding Initiative Request

### Fiscal Year 2019-2020

LFIR#: 1136

**1. Title of Project:** Bal Harbour Village Storm Water System Improvement

**2. Senate Sponsor:** Jason Pizzo

**3. Date of Submission:** 02/01/2019

**4. Project/Program Description:**

Village of Bal Harbour Stormwater System Improvements - Bal Harbour Village was incorporated in 1946, at which time the majority of the Village's utility infrastructure was constructed. Additional portions of the Village's infrastructure were constructed in the late 1960s with repairs and modifications completed in the years since. The Village's stormwater system was likewise constructed in 1946. At the time of the stormwater system construction, standards governing such a system did not exist. The Village did construct some improvements approximately 20 years ago however those improvements were limited and need to be extended at this time. The village has prepared a Master Plan to permanently address the current deficiencies throughout the Village. Partial funds have been secured however additional funds are needed to complete the construction in its entirety.

**11. Program Performance:**

**a. What is the specific purpose or goal that will be achieved by the funds requested?**

The improvements will substantially reduce the potential for flooding of the streets, homes and businesses throughout the Village. The new storm water system will ensure the continued health, safety and welfare of the Village residents and its visitors which largely contribute to the local and state economy. The planned storm water improvements will also improve the environmental conditions through the installation of pollution control structures, which will separate the pollutants prior to discharge into the local water body, Biscayne Bay. The new stormwater system will also be designed to accommodate the anticipated sea level rise so that the system will be adequate for the future.

**b. What are the activities and services that will be provided to meet the intended purpose of these funds?**

These include phased progression beginning with concept plans, architectural and engineering components, permitting and finally construction. Planning and Design are complete and construction is ongoing; stormwater phase is ready to commence.

**c. What are the direct services to be provided to citizens by the appropriations project?**

The improvements will substantially reduce the potential for flooding of the streets, homes and businesses throughout the Village and will improve the environmental conditions of the local water body, Biscayne Bay. The new stormwater system will also be designed to accommodate the anticipated sea level rise, and assist the County with environmental compliance issues.

**d. Who is the target population served by this project? How many individuals are expected to be served?**

The residents, property owners, visitors, and businesses within the Village of Bal Harbour would be the target population served by this project.

**e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?**

Annual reporting via NPDES will continue to be implemented to measure the proposed water quality improvements. Additionally, the monitoring of water quantity will begin as the reality and concern for sea level rise continues. The goal of the Village is to be proactive rather than reactive on these very sensitive issues.

**f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for in the contract?**

Reimbursement of State Funds.
