Local Funding Initiative Request

Fiscal Year 2019-2020

LFIR#: 1223

1. Title of Project: North Lauderdale C-14 Pump Station

2. Senate Sponsor: Perry Thurston

3. Date of Submission: 01/16/2019

4. Project/Program Description:

Intense storm events in the City of North Lauderdale cause major flooding issues on the roads and also in the back yards of residents who are adjacent to the City's canals. Roads are closed for long periods of time after these events and residential property damage is common. The best way to protect the property of the citizens of North Lauderdale is to install the City's own drainage pump structure that can lower the canal levels in the City's canal drainage network and work in tandem with the other municipal pumps discharging into the C-14 canal. In this way the City will be able to monitor the canal levels and manage the flow of the water. If a drainage pump structure is not installed the City will face future challenges of frequent flooding of the roads and residential property. Roads would have to be repaired more often since the flood waters would weaken the integrity of the asphalt.

11. Program Performance:

a. What is the specific purpose or goal that will be achieved by the funds requested?

The specific purpose of the funds is to provide a drainage pump for the City in order to manage the canal levels in the City's canal drainage network. Intense storm events cause major flooding issues on the roads and also cause property damage. The best way to protect the property of the citizens of North Lauderdale is to install the City's own drainage pump structure that can lower the canal levels in the City's canal drainage network discharging into the C-14 canal.

b. What are the activities and services that will be provided to meet the intended purpose of these funds?

Installation of the C-14 pump station

c. What are the direct services to be provided to citizens by the appropriations project?

Less flooding of the City's roads and residential back yards that are adjacent to City canals.

d. Who is the target population served by this project? How many individuals are expected to be served?

Citizens of North Lauderdale, 50%

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

Benefit will be less flooding events. Measured by number of flooding events.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for in the contract?

10% retainage withheld; Performance Bond
