Local Funding Initiative Request

Fiscal Year 2019-2020

LFIR#: 1231

1. Title of Project: Margate Stormwater Pipe Replacement and Lining

2. Senate Sponsor: Perry Thurston

3. Date of Submission: 01/24/2019

4. Project/Program Description:

This project includes lining or replacement of approximately 4,000 linear feet of stormwater pipes throughout the City of Margate. As these pipes are approaching 50-65 years old, these stormwater pipes are failing. These increasing failures are causing flooding, sinkholes, road depression, and blockages in the drainage system.

5. State Agency to receive requested funds : Department of Environmental Protection

State Agency Contacted? No

6. Amount of the Nonrecurring Request for Fiscal Year 2019-2020

Type of Funding	Amount
Operations	
Fixed Capital Outlay	250,000
Total State Funds Requested	250,000

7. Total Project Cost for Fiscal Year 2019-2020 (including matching funds available for this project)

Type of Funding	Amount	Percent

11. Program Performance:

a. What is the specific purpose or goal that will be achieved by the funds requested?

Margate's stormwater pipe infrastructure is aging and has begun to show areas of concern. Continuous issues include collapses, sinkholes, and depressions in roadways caused by perforations in the pipes and interruptions in the drainage of roadways due to pipe blockages related to failures of the pipe metal. By lining or replacing pipes, the City will be improving the stormwater infrastructure for the next 50 years, resulting in a decreased flooding risk, sinkholes, road depressions, and drainage blocks.

b. What are the activities and services that will be provided to meet the intended purpose of these funds?

Funding will be used to either line or replace stormwater pipe that is 50-65 years of age. It is estimated that the City will be able to line or replace approximately 4,000 linear feet of stormwater pipes as part of this project.

c. What are the direct services to be provided to citizens by the appropriations project?

Residents have experienced major flooding events as a result of hurricanes and other weather systems. By lining or replacing stormwater pipes, the City will be able to provide secure and efficient drainage, resulting in a reduction of flooding and reduction of road repair interruptions.

d. Who is the target population served by this project? How many individuals are expected to be served?

All residents of the City of Margate, specifically those living in flood-prone areas.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

Lining and replacing stormwater pipes will result in the update and improvement of the entire stormwater infrastructure. It is anticipated that the City will experience fewer pipe collapses, sinkholes, and flooding after project completion.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard
