Construction/Renovation/ Land/Planning	Construction of storm water pollution control devices and tabout 200 LF of seawall to protect the area from further erosion and sediment control	350,000
Engineering		
Total State Funds Re	quested (must equal total from question #6)	350,000

LFIR # 1519

#### 11. Program Performance

a. What specific purpose or goal will be achieved by the funds requested?

The purpose of this project is to improve water quality rupoff from impervious areas to discharge into the SEWMD C-6 (Miami Canal)

	an impaired watershed for fecal coliforms in WBID 3290 C6 (Miami Canal), Group 4. This project will improve water quality, prevention of erosion, sediment control, nutrients and fluctuation of elevation that can adversely affect the Miami Canal. The new seawall will assist with water quality standards as part of state requirements as the Town is a co-permittee with Miami-Dade County for MS4 permit number FLS0000003.
b.	What activities and services will be provided to meet the intended purpose of these funds?
	This project includes the repair of seawalls and the installation catch basins with baffled sediment traps to improve the water quality of the runoff discharging into SFWMD C-6 (Miami Canal). The project will also include a public outreach component.
C.	What direct services will be provided to citizens by the appropriation project?
	This project will benefit residents from local and adjacent areas as well as other visitors by improving the seawall of the Tobie Wilson Community Center and improving the water quality of the runoff to the Miami Canal.
d.	Who is the target population served by this project? How many individuals are expected to be served?
	The target population is about 1,000 of low-to-middle income residents as well as other 1,500 visitors from adjacent communities to the Town of Medley that will benefit by using the property.
e.	What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?
	The expected benefits of this project are to improve water quality by retrofitting stormwater outfalls with storm water pollution control devices as well as to increase community awareness through the Town of Medley education programs and encourage continued participation in cleanup programs such as Adopt a Waterway. The methodology for this project includes structural as well as non-structural components to provide a comprehensive approach. Stormwater treatment technology combined with improved hydrologic flow and public education will be the hallmark of this project's success.
f.	What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for in the contract?
	No penalties
