

LFIR # 2165

- 1. **Project Title** Pensacola Bayou Chico Stormwater Runoff Mitigation Study
- 2. Senate Sponsor Doug Broxson
- 3. Date of Request 01/09/2020

4. **Project/Program Description**

This is a request for a study to be conducted to assess the need for enhanced stormwater runoff quality prior to discharge in to Bayou Chico. Bayou Chico is one of the most contaminated waterways in the state and a study on the need for stormwater runoff improvements is greatly needed to coincide with the upcoming Bayou Chico contamination dredging project that being conducted in the coming years by Escambia County. All of these efforts are needed to reduce nutrient and bacteriological impairment.

5. State Agency to receive requested funds

Department of Environmental Protection

State Agency contacted? O Yes

No

6. Amount of the Nonrecurring Request for Fiscal Year 2020-2021

Type of Funding Amount	
Operations	250,000
Fixed Capital Outlay	000
Total State Funds Requested	250,000

7. Total Project Cost for Fiscal Year 2020-2021 (including matching funds available for this project)

Type of Funding	Amount	Percentage
Total State Funds Requested (from question #6)	250000	100.0 %
Matching Funds		
Federal	00	0 %
State (excluding the amount of this request)	00	0 %
Local	00	0 %
Other	00	0 %
Total Project Costs for Fiscal Year 2020-2021	250,000	100 %

8. Has this project previously received state funding? • Yes • No

If yes, provide the most recent instance:

Fiscal Year	Amo	ount	Specific	
(уууу-уу)	Recurring	Nonrecurring	Appropriation #	Vetoed

9. Is future-year funding likely to be requested? O Yes O No

If yes, indicate nonrecurring amount per year.

LFIR # 2165

10. Details on how the requested state funds will be expended

Spending Category	Description	Amount
Administrative Costs:		
Executive Director/Project Head Salary and Benefits		
Other Salary and Benefits		
Expense/Equipment/ Travel/Supplies/Other		
Consultants/Contracted Services/Study		
Operational Costs: Oth	er	
Salary and Benefits		
Expense/Equipment/ Travel/Supplies/Other		
Consultants/Contracted Services/Study	Conduct a study of stormwater runoff improvements that discharge in to Bayou Chico.	250,000
Fixed Capital Construc	tion/Major Renovation:	
Construction/Renovation/ Land/Planning Engineering		
Total State Funds Re	quested (must equal total from question #6)	250,000

11. Program Performance

a. What specific purpose or goal will be achieved by the funds requested?

This is a request for a study to be conducted to assess the need for enhanced stormwater runoff quality prior to discharge in to Bayou Chico. Bayou Chico is one of the most contaminated waterways in the state and a study on the need for stormwater runoff improvements is greatly needed to coincide with the upcoming Bayou Chico contamination dredging project that being conducted in the coming years by Escambia County. All of these efforts are needed to reduce nutrient and bacteriological impairment.

b. What activities and services will be provided to meet the intended purpose of these funds?

n/a

n/a

c. What direct services will be provided to citizens by the appropriation project?

d. Who is the target population served by this project? How many individuals are expected to be served?

It will benefit the surrounding area around Bayou Chico which includes businesses and residents that live along the Bayou. More than 800 individuals will be served.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

Stormwater runoff improvements will help reduce nutrient and bacteriological impairments that are going in to the bayou that is causing contamination. Methodology: The study will either show the need for improvements or will not. If this study shows the need for these improvements the reduce contamination to bayou will allow for the water quality to improve their increasing the wildlife and fish population in and around the bayou. Methodology: The study will either show the need for these improvements or it will not. If this study shows the needs for improvements then the contamination into the Bayou will be reduced. Methodology: The study will either show the need these improvements or it will not. One of the targeted areas of the study is an intersection on a main road that floods near the bayou and that water then runoff further down into the bayou. Methodology: Study will either show how to mitigate this nuisance flooding or it will show no need for any changes.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for in the contract?

Loss of funding.

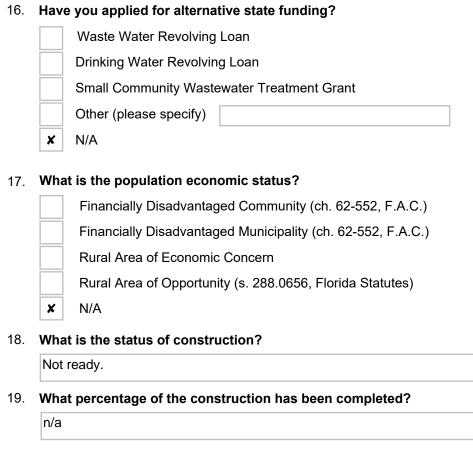

LFIR # 2165

12. The owners of the facility to receive, directly or indirectly, any fixed capital outlay funding. Include the relationship between the owners of the facility and the entity.
