

LFIR # 2368

pagram Description and Roadway Improvement projects address a low lying area within the City that does not contain an existing draina equently, during the rainy season, this area has expansive flooding of the roadway, and often results in property damnesses and residential homes. These roads provide access to a health facility and other critical services for the common soil, the low lying conditions, and the higher water table are all factors that exacerbate the flooding and untreated prosens the City's water quality. The resultant ponding hastens mosquitoes, liter and potential contamination of the C in system, creating a health hazard. This funding would enable the City of Opa-locka to address this flooding and assistructing an adequate Stormwater drainage system, reduce pollution and provide adequate treatment of runoff discharge quality. 1	1	Pr	ogi	ram	Pe	erf	or	m	ar	ıc	е

a.	What specific purpose or goal will be achieved by the funds requested?
	Reduce/eliminate roadway flooding
b.	What activities and services will be provided to meet the intended purpose of these funds?
	Citywide assessment to determine the extent and type of drainage systems needed to mitigate the flooding condition.
c.	What direct services will be provided to citizens by the appropriation project?
	Mitigation of roadway flooding and potholes
d.	Who is the target population served by this project? How many individuals are expected to be served?
	All of Opa-locka residents and businesses
e.	What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?
	The immediate measurement would be the reduction/elimination of potholes that are formed from the roadways being in a constantly flooded state.
f.	What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for in the contract?
	Termination of contracts.
