Amendment

Remove lines 10-61 and insert:

(10) "Gasification" means a process through which recovered materials are heated and converted to synthesis gas in an oxygen-deficient atmosphere, and then converted to crude, fuel, or chemical feedstocks.

(24) "Post-use polymer" means a polymer that is derived from any domestic, commercial, or municipal activity and recycled in commercial markets which might otherwise become waste if not converted to manufacture crude, fuels, or other raw materials or intermediate or final products using gasification, pyrolysis, or another thermal conversion process. A post-use

Amendment No. 1

17 polymer as defined in this subsection may contain incidental
18 contaminants or impurities such as paper labels or metal rings.

19 (26) "Pyrolysis" means a process through which recovered
20 materials are heated in the absence of oxygen until melted and
21 thermally decomposed, and then cooled, condensed, and converted
22 to:

23 (a) Crude oil, diesel, gasoline, home heating oil, or
24 another fuel;

25 (b) Feedstocks;

26 (c) Diesel and gasoline blendstocks;

27 (d) Chemicals, waxes, or lubricants; or

28 (e) Other raw materials or intermediate or final products.

29 (27) "Pyrolysis facility" means a facility that collects,
30 separates, stores, and converts recovered materials using
31 gasification, pyrolysis, or another thermal conversion process.
32 A pyrolysis facility as defined in this subsection is not a
33 waste management facility.

34 (28)-(24) "Recovered materials" means metal, paper, glass,
35 plastic, textile, or rubber materials that have known recycling
36 potential, can be feasibly recycled, and have been diverted and
37 source separated or have been removed from the solid waste
38 stream for sale, use, or reuse as raw materials, whether or not
39 the materials require subsequent processing or separation from
40 each other, and include post-use polymers that are converted to
41 manufacture crude, fuels, or other raw materials or intermediate

Amendment No. 1

42 or final products using gasification, pyrolysis, or another
43 thermal conversion process. ~~but~~ The term does not include
44 materials destined for any use that constitutes disposal.
45 Recovered materials as defined ~~described~~ in this subsection are
46 not solid waste.

47 Remove lines 68-72 and insert:

48 ~~(31)-(27)~~ "Recycling" means any process by which solid
49 waste, or materials that would otherwise become solid waste, are
50 collected, separated, or processed and reused or returned to use
51 in the form of raw materials or intermediate or final products,
52 including, but not limited to, crude, fuel, and fuel
53 substitutes.

54 Remove lines 104-111 and insert:

55 (e) Recovered materials or recovered materials processing
56 facilities, except as provided in s. 403.7046, if:

57 1. A majority of the recovered materials at the facility
58 are demonstrated to be sold, used, or reused within 1 year. As
59 used in this subparagraph, the term "used or reused" includes
60 the conversion of recovered materials into crude, fuel,
61 feedstocks or other raw materials or intermediate or final
62 products by gasification or pyrolysis, as defined in s. 403.703,
63 or by another thermal conversion process.
64
