

## HOUSE OF REPRESENTATIVES STAFF ANALYSIS

**BILL #:** CS/HB 1009 Organ Donation and Transplantation  
**SPONSOR(S):** Finance & Facilities Subcommittee, Latvala and others  
**TIED BILLS:** **IDEN./SIM. BILLS:** SB 1318

REFERENCE	ACTION	ANALYST	STAFF DIRECTOR or BUDGET/POLICY CHIEF
1) Finance & Facilities Subcommittee	14 Y, 0 N, As CS	Morris	Lloyd
2) Secondary Education & Career Development Subcommittee			
3) Environment, Agriculture & Flooding Subcommittee			
4) Health & Human Services Committee			

### SUMMARY ANALYSIS

Organ and tissue donation is the process of surgically removing an organ or tissue from one person (the donor) and transplanting it into another person (the recipient). Transplantation in such cases is necessary because the recipient's organ has failed or has been damaged by disease and injury. HB 1009 amends multiple sections of law related to organ donation.

The bill requires The Agency for Health Care Administration (AHCA) to include minimum volume standards for organ transplants in their rules for health care facilities.

The bill prohibits a transplant facility from charging the donor, or his or her family, any fees for services related to the procurement or donation of his or her organs.

The bill adds a requirement to educate the public on state and federal law relating to the organ donation transplant process to the current public education program administered by AHCA. The bill also requires Donate Life Florida to consult with the State Board of Education to develop an instructional curriculum relating to organ donor registration for grade 9 through 12 students which shall be taught in public schools.

The bill requires individuals who make requests to patients, living donors, or family members for a decedent's organs to explain the protocols of federal regulations regarding organ donation, in addition to those of the hospital and state, as currently required.

The bill directs the Organ and Tissue Procurement and Transplantation Advisory Board to submit recommendations relating to the regulation of organ transplants to AHCA.

The bill has a significant, negative fiscal impact on AHCA. The bill has no impact on local governments.

The bill provides an effective date of July 1, 2021.

## FULL ANALYSIS

### I. SUBSTANTIVE ANALYSIS

#### A. EFFECT OF PROPOSED CHANGES:

##### **Background**

##### **Organ Donation**

Organ and tissue donation is the process of surgically removing an organ or tissue from one person (the donor) and transplanting it into another person (the recipient). Transplantation in such cases is necessary because the recipient's organ has failed or has been damaged by disease or injury. Transplantable organs include the kidneys, liver, heart, lungs, pancreas and intestine.<sup>1</sup> Transplantable tissue include skin used as a temporary dressing for burns, serious abrasions and other exposed areas; heart valves used to replace defective valves; tendons used to repair torn ligaments on knees or other joints; veins used in cardiac by-pass surgery; corneas used to restore sight; and bone used in orthopedic surgery to facilitate healing of fractures or prevent amputation.<sup>2</sup>

A single person can save up to eight lives through organ donation, and dozens more lives may be improved through tissue donation.<sup>3</sup> While most organ and tissue donations occur after the donor has died, some organs and tissues can be donated while the donor is alive, such as a kidney or part of a liver or lung.<sup>4</sup> There are about as many living donors every year as there are deceased donors.<sup>5</sup>

Despite advances in medicine and technology, and increased awareness of organ donation and transplantation, more donors are needed to meet the demand for transplants.<sup>6</sup> As of January 2020, there are more than 112,000 children and adults,<sup>7</sup> including over 5,000 Floridians.<sup>8</sup> Over 39,000 organ transplants were performed in 2019 with organs from more than 19,000 donors.<sup>9</sup>

##### **Organ Donation, Procurement, and Transplant Process**

Established by the National Organ Transplant Act (NOTA) of 1984, the Organ Procurement and Transplantation Network (OPTN) is a public-private partnership that links all professionals involved in the nation's donation and transplant system.<sup>10</sup> The United Network for Organ Sharing (UNOS), a private, non-profit organization based in Richmond, Virginia, serves as the OPTN under contract with the U.S. Department of Health and Human Services.<sup>11</sup> UNOS coordinates how donor organs are matched and allocated to patients on the waiting list.<sup>12</sup> Non-profit, federally designated organ procurement organizations (OPOs) work closely with UNOS, hospitals, and transplant centers to facilitate the organ donation and transplantation process,<sup>13</sup> including conducting a thorough medical

and social history of the potential donor to help determine the suitability of his or her organs for transplantation.<sup>14</sup>

The donation process begins when a person, or their family if the person was not already a registered donor before brain death, decides to become an organ donor. After brain death is declared, the donor's body is kept functioning by artificial means, such as a ventilator support.<sup>15</sup> Specially-trained medical practitioners from the OPO evaluates the patient to determine if they are medically suitable to donate their organs.<sup>16</sup> If the patient is suitable, their organs are surgically removed and sent to the transplant hospitals where transplant candidates are waiting.<sup>17</sup> The deceased donor's blood type, height, weight, the hospital zip code, and other data are entered into UNOS' national database to begin the organ allocation process.<sup>18</sup>

Transplant candidates are patients on the transplant waiting list. A patient is usually referred to a transplant center by their physician for placement on the waiting list.<sup>19</sup> The transplant center's transplant teams, composed of transplant physicians, surgeons and other practitioners, perform a medical evaluation of the patient.<sup>20</sup> Each transplant center sets its own criteria to help determine if a patient is a good or bad candidate.<sup>21</sup> Typical criteria includes weight, age, and health history. If the patient is a bad candidate, the patient is not placed on the waiting list, but can try to get placed on the waiting list at another transplant center or be reconsidered by the same transplant center if their condition improves (for example, losing weight as directed).<sup>22</sup> If a patient is determined to be a good candidate for an organ transplant, they are placed on the waiting list by the transplant center and wait for an organ to become available. Candidates are able to be placed on the waiting list at more than one transplant center.<sup>23</sup>

When an organ becomes available, the OPO will query the national database for a match based on a variety of factors, including relative location of the recipient to the organ, blood type, weight, and age.<sup>24</sup> If a match is found, the transplant surgeon will evaluate the potential recipient of the organ transplant and make a determination on whether the potential recipient is medically suitable.<sup>25</sup> The transplant team only has one hour to make this determination.<sup>26</sup> If suitable, the organ is transported to the transplant center where the recipient is waiting and the transplant surgery is performed, otherwise the potential recipient remains on the waiting list.

<sup>26</sup> Id.

The Agency for Health Care Administration (AHCA) oversees the various organizations and facilities involved in the organ procurement and transplant process in this state. AHCA licenses transplant facilities, contracts with an organization to educate the public on organ donation, sets requirements for training individuals who engage with families whose deceased relatives may be a good candidate for organ donation, and supports the Organ Transplant Advisory Council and the Organ and Tissue Procurement and Transplantation Advisory Board.

### Organ Donor Registry

In 2008,<sup>27</sup> Florida's Legislature found that a shortage of organ and tissue donors existed in Florida. Findings included a need for:

- A statewide donor registry with online donor registration capability; and
- Enhanced donor education, to increase the number of organ and tissue donors.

The online registry would afford more persons who are awaiting organ or tissue transplants the opportunity for a full and productive life.<sup>28</sup> As directed by the legislature, AHCA and the Department of Highway Safety and Motor Vehicles (DHSMV) jointly contracted for the operation of Florida's interactive web-based donor registry that allows for online donor registration and the recording of organ and tissue donation records submitted through the driver license identification program or through other sources. AHCA and the DHSMV selected Donate Life Florida, which is a coalition of Florida's organ, tissue, and eye donor programs, to run the donor registry and maintain donor records.

Floridians who are age 18 or older can join the donor registry either online, at the DHSMV (or their local driver license office), or by contacting Donate Life Florida for a paper application.<sup>29</sup> Children ages 13 to 17 may join the registry, but the final decision on any organ donation of a minor rests with the parent or guardian. The registry collects personal information from each donor including, but not limited to, his or her name, address, date and place of birth, race, ethnicity, and driver's license number.

As of March 3, 2021, there were 11,468,537 people registered in the donor registry.<sup>30</sup>

A person may make an anatomical gift of all or part of his or her body by:<sup>31</sup>

- Signing an organ and tissue donor card;
- Registering online with the donor registry;
- Signifying an intent to donate on his or her driver license or identification card issued by the DHSMV;<sup>32</sup>
- Expressing a wish to donate in a living will or other advance directive;
- Executing a will that includes a provision indicating that the testator wishes to make an anatomical gift;<sup>33</sup> or
- Expressing a wish to donate in a document other than a will.<sup>34</sup>

### Donor Education

When a patient dies in a hospital and is not a registered organ donor, but is determined to be a good candidate by the hospital's medical staff and the OPO, a representative of the OPO or a member of the

---

<sup>27</sup> Ch. 2008-223, Laws of Fla.

<sup>28</sup> S. 765.5155(1), F.S.

<sup>29</sup> Donate Life Florida, *Welcome to the Joshua Abbott Organ and Tissue Donor Registry*, <http://www.donateliflorida.org/> (last visited March 3, 2021)

<sup>30</sup> Id.

<sup>31</sup> S. 765.514(1), F.S.

<sup>32</sup> Revocation, suspension, expiration, or cancellation of the driver license or identification card does not invalidate the gift.

<sup>33</sup> The gift becomes effective upon the death of the testator without waiting for probate. If the will is not probated or if it is declared invalid for testamentary purposes, the gift is nevertheless valid to the extent that it has been acted upon in good faith.

<sup>34</sup> The document must be signed by the donor in the presence of two witnesses who shall sign the document in the donor's presence. If the donor cannot sign, the document may be signed for him or her at the donor's direction and in his or her presence and the presence of two witnesses who must sign the document in the donor's presence. Delivery of the document of gift during the donor's lifetime is not necessary to make the gift valid.

hospital's staff may approach the patient's family about organ donation.<sup>35</sup> AHCA has developed rules for training and guidelines for the person making the request for organ donation.<sup>36</sup> The requestor is trained in explaining the process of organ donation to the patient's family, including their right to allow or refuse donation and for what purpose the organs would be donated (transplantation, research, or education).<sup>37</sup> The requestor is also specifically trained in the different types of approaches to deal with a family's grief and offering them the opportunity for organ donation.<sup>38</sup> The current rules require the requestor to explain the requirements needed to be met under Florida law in order for a donation to be allowed, but not federal regulations relating to organ donation.

### Organ Donation Fees

Generally, an organ donor and their family are not charged by a transplant facility for the medical care required to donate an organ.<sup>39</sup> Families pay for medical care and funeral costs, but costs related to living or deceased donation are paid by the recipient, usually through insurance, Medicare, or Medicaid.<sup>40</sup> Typically, any cost that falls outside of the transplant center's donor evaluation or actual surgery, such as travel, lodging, lost wages, and other non-medical expenses, is borne by the living donor or recipient.<sup>41</sup>

### Organ and Tissue Procurement and Transplantation Advisory Board

Created by the Legislature in 1991, the Organ and Tissue Procurement and Transplantation Advisory Board (board) is housed at AHCA. Current law requires the board to assist AHCA in the development of professional qualifications of people involved in the organ donation and transplant process. The board is also tasked with helping AHCA monitor expenses associated with organ and tissue procurement, processing, and distribution for transplantation. Current law requires the board to provide assistance to the Florida Medical Examiners Commission in the development of appropriate procedures and protocols to ensure the continued improvement in the approval and release of potential donors by the district medical examiners and associate medical examiners.<sup>42</sup>

Additionally, the board works with AHCA on necessary recommendations for procedures and protocols to assure that all Floridians have reasonable access to available organ and tissue transplants according to the severity of his or her medical condition and need. In collaboration with AHCA, the board also develops recommendations for any changes to state laws or administrative rules to ensure that the statewide organ and tissue procurement and transplantation system is able to function smoothly, effectively, and efficiently, in accordance with federal laws.<sup>43</sup>

The board consists of 14 members who are appointed by the Secretary of AHCA, including:<sup>44</sup>

- Two with expertise in vascular organ transplant surgery;
- Two with expertise in vascular organ procurement, preservation, and distribution;
- Two with expertise in musculoskeletal tissue transplant surgery;
- Two with expertise in musculoskeletal tissue procurement, processing, and distribution;

- A representative from the Florida Medical Examiners Commission.

The board has not met since 2013.<sup>45</sup>

### Organ Transplantation Regulation

Federal law requires transplant hospitals to be a member of the OPTN and abide by OPTN bylaws in order to provide transplant services.<sup>46</sup> The federal certification requirements include minimum volume standards for initial certification.<sup>47</sup> To obtain initial certification, an organ-specific transplant program must generally perform 10 transplants over a 12-month period.<sup>48</sup>

Current AHCA rule contains provisions relating to licensure of organ transplantation programs in the state, but does not include minimum volume standards for organ transplant services.<sup>49</sup> AHCA recently proposed a rule to require organ transplant licensees and applicants to seek and maintain federal certification from the federal Centers for Medicare and Medicaid Services.<sup>50</sup>

The proposed AHCA rule requires a hospital providing adult heart, kidney, liver, or lung transplants to meet such requirement within one year from initial licensure of each transplant program and to maintain such requirement in order to keep their license.<sup>51</sup> OPTN bylaws require transplant programs to meet the following volume requirements to remain functionally active:<sup>52</sup>

For This Transplant Program Type	Functional Inactivity Definition
Kidney, Liver, or Heart	Failure to perform at least 1 transplant in 3 consecutive months
Lung	Failure to perform at least 1 transplant in 6 consecutive months
Stand-alone pediatric	Failure to perform at least 1 transplant in 12 consecutive months
Pancreas	<p><i>Both</i> of the following:</p> <ol style="list-style-type: none"> <li>1. Failure to perform at least 2 transplants in 12 consecutive months; and</li> <li>2. <i>Either</i> of the following in 12 consecutive months: <ul style="list-style-type: none"> <li>• A median waiting time of the program's kidney-pancreas and pancreas candidates that is above the 67<sup>th</sup> percentile of the</li> </ul> </li> </ol>

	national waiting time; or <ul style="list-style-type: none"> <li>• The program had no kidney-pancreas or pancreas candidates registered at the program.</li> </ul>
Islet, intestinal, and vascularized composite allograft	No functional inactivity definitions have been established.

## Required Instruction in Schools

Florida law specifies required coursework and instruction for public school students. Specifically, each district school board must provide all courses required for middle grades promotion, high school graduation, and appropriate instruction designed to ensure that students meet State Board of Education (SBE) adopted standards in the following subject areas: reading and other language arts, mathematics, science, social studies, foreign languages, health and physical education, and the arts.<sup>53</sup>

Instructional staff of public schools, subject to the rules of the SBE and the district school board, must provide instruction in:<sup>54</sup>

- The history and content of the Declaration of Independence;
- The history, meaning, significance, and effect of the provisions of the Constitution of the United States;
- The arguments in support of adopting our republican form of government;
- Flag education, including proper flag display and flag salute;
- The elements of civil government;
- The history of the United States;
- The history of the Holocaust;
- The history of African Americans;
- The elementary principles of agriculture;
- The effects of alcoholic and intoxicating liquors and beverages and narcotics;
- Kindness to animals;
- The history of the state;
- Conservation of natural resources;
- Comprehensive health education;
- The study of Hispanic contributions to the United States;
- The study of women's contributions to the United States;
- The nature and importance of free enterprise to the United States economy;
- A character-development program in kindergarten through grade 12; and
- The sacrifices that veterans and Medal of Honor recipients have made serving the country.

## Effect of Proposed Changes

### Regulation of Organ Donation and Transplantation in Florida

The bill substantially revises the duties of AHCA relating to organ donation, including the duties of the Organ and Tissue Procurement and Transplantation Advisory Board, rulemaking, and mandated reports.

### Donor Education

The bill requires Donate Life to modify their education program to include federal laws relating to anatomical gifts and the organ donation and transplantation process. AHCA may need to amend their current contract with Donate Life to address the new requirements.

<sup>53</sup> S. 1003.42(1), F.S.

<sup>54</sup> The law encourages the SBE to adopt standards and pursue assessment relating to the required instructional content. S. 1003.42(2), F.S.

The bill amends AHCA's requirement to develop rules and guidelines associated with organ donor education to require that individuals designated by the hospital administrator or organ procurement organization who make a request for donor consent clearly explain hospital protocols and state and federal regulations pertaining to organ donation.

### Organ Donation Fees

The bill prohibits an organ transplantation facility from charging a donor or his or her family member any fee for services related to the donation or procurement of his or her organs. The impact of this is unclear, since, generally, the recipient or his or her insurance carrier pay for the services.

### Organ and Tissue Procurement and Transplantation Advisory Board

The bill revises the duties of the Organ and Tissue Procurement and Transplantation Advisory Board by requiring the board to submit recommendations to AHCA by September 1, 2022, relating to the following:

- Frequency of communication between patients and transplant coordinators;
- Monitoring of transplant facilities and annual reporting of aggregate organ recipient data, including relevant information regarding the number of patients on the waiting list statewide and the number of patients who receive transplants;
- Establishment of a communication system between living donors and transplant facilities;
- Incentives necessary to increase organ donation;
- Creation of a more efficient organ donation process;
- Opportunities and incentives for organ transplantation research;
- Best practices for transplant hospitals and OPOs to promote the most effective and efficient patient outcomes; and
- Monitoring of OPOs.

### Organ Transplantation Regulation

The bill requires AHCA to include minimum volume standards for organ transplants in their rule regulating minimum standards for health care facilities.

Current rules do not require minimum volume standards for the provision of organ transplant services. AHCA is currently in the rulemaking process to establish initial and continued licensure requirements for organ transplant programs. The current proposed rule draft includes minimum volume standards for the provision of organ transplant services. If AHCA finalizes the rules prior to the bill becoming law, AHCA will not have to change the rules to include minimum volume standards.

### **Required Instruction in Schools**

The bill requires Donate Life Florida to consult with the State Board of Education to develop an instructional curriculum relating to organ donor registration for grade 9 through 12 students which is required to be taught in public schools.

The bill provides an effective date of July 1, 2021.

#### **B. SECTION DIRECTORY:**

- |                  |   |
|------------------|---|
| <b>Section 1</b> | Amends s. 395.1055, F.S., relating to rules and enforcement.  |
| <b>Section 2</b> | Amends s. 765.5155, F.S., relating to donor registry; education program.  |
| <b>Section 3</b> | Amends s. 765.517, F.S., relating to rights and duties at death.  |
| <b>Section 4</b> | Amends s. 765.522, F.S., relating to duty of hospital administrators; liability of hospital administrators and procurement organizations. |

- Section 5** Amends s. 765.543, F.S., relating to Organ and Tissue Procurement and Transplantation Advisory Board; creation; duties.
- Section 6** Amends s. 1003.42, F.S., relating to required instruction.
- Section 7** Provides an effective date of July 1, 2021.

## **II. FISCAL ANALYSIS & ECONOMIC IMPACT STATEMENT**

### **A. FISCAL IMPACT ON STATE GOVERNMENT:**

1. Revenues:

None.

2. Expenditures:

The bill has a significant, negative fiscal impact to AHCA. AHCA estimates one OPS position at a total of over eighteen months will be needed to carry out the new reporting duties assigned to the Organ Tissue Procurement and Transplantation Advisory Board during the 2021-2022 and 2022-2023 Fiscal Years. AHCA estimates \$56,042 and \$19,797 will be needed for Fiscal Years 2021-2022 and 2022-2023, respectively, for a total of \$75,625. The OPS position will:<sup>55</sup>

- Facilitate the appointment or reinstatement of Board members;
- Manage activities of the Board including member support, meeting sponsorship and arrangement, agendas, minutes, travel and reimbursement;
- Develop required reports and manage panel materials and publication;
- Manage data collection, notice publication and response to questions and technical assistance for submitter and the public; and
- Assist with the development and amendment of administrative rules based on recommendations.

### **B. FISCAL IMPACT ON LOCAL GOVERNMENTS:**

1. Revenues:

None.

2. Expenditures:

None.

### **C. DIRECT ECONOMIC IMPACT ON PRIVATE SECTOR:**

The bill prohibits transplant facilities from charging a donor or the donor's family for fees related to the donation or procurement of the donor's organs. Since such facilities generally do not charge such fees, this provision has no fiscal impact to transplant facilities.

### **D. FISCAL COMMENTS:**

None.

## **III. COMMENTS**

### **A. CONSTITUTIONAL ISSUES:**

1. Applicability of Municipality/County Mandates Provision:

Not Applicable. This bill does not appear to affect county or municipal governments.

---

<sup>55</sup> Agency for Health Care Administration, Agency Analysis of 2021 House Bill 1009, p. 4 (March 5, 2021).

2. Other:

None.

**B. RULE-MAKING AUTHORITY:**

Current law and the bill provide sufficient rule-making authority for AHCA to implement the provisions of this bill.

**C. DRAFTING ISSUES OR OTHER COMMENTS:**

None.

**IV. AMENDMENTS/ COMMITTEE SUBSTITUTE CHANGES**

On March 17, 2021, the Finance and Facilities Subcommittee adopted an amendment and reported the bill favorable as a committee substitute. The amendment removes the:

- Requirement that AHCA include minimum volume standards for neonatal intensive care services in their rules for health care facilities to address a single subject concern.
- Authorization of benefits that are already provided by the Medicaid program.
- Requirement for the Florida Fish and Wildlife Conservation Commission to maintain an integrated link on its website referring a visitor applying for a hunting, fishing, or trapping license to the organ donor registry.
- Requirement mandating the display and distribution of educational materials at locations where hunting, fishing and recreational licenses are sold.
- Prohibition on preexisting condition exclusions related to living organ donors.

This analysis is drafted to the committee substitute as passed by the Finance and Facilities Subcommittee.
