I. Summary:

SB 534 repeals the limits on the size of a wine container, which in current law may not hold more than one gallon, unless the container is reusable and holds 5.16 gallons.

Wine Container Size Limits

Section 564.05, F.S., prohibits the sale of wine in an individual container that holds more than one gallon (3.785 liters) of wine. However, wine may be sold in a reusable container of 5.16 gallons (19.5 liters). Distributors and manufacturers may sell wine to other distributors and manufacturers in containers of any size. Any person who violates the prohibition in s. 564.05, F.S., commits a second degree misdemeanor.⁶

Federal law specifies fill standards for wine containers.⁷ The wine container must be filled to contain the quantity of wine authorized in the federal fill standards so as not to mislead the consumer.⁸ The authorized standards of fill range from 50 milliliters to three liters. However, if the fill of the wine container is four liters or larger, the container must be labeled in even liters, e.g., four liters, five liters, etc.⁹ There are also several exceptions to the standard fill requirements, including exceptions for certain imported wines in original containers, wines bottled before specified dates, and wine packed in containers of 18 liters or more.¹⁰
