# Senate Base Maps Presentation

Monday, October 19, 2015

Senate Committee on Reapportionment Jay Ferrin, Staff Director

House Select Committee on Redistricting

Jason Poreda, Staff Director

Jeff Takacs, Special Advisor

### Base Map Procedures

- In a July 28 memo, the President and Speaker instructed House and Senate professional staff to work collaboratively with legal counsel to develop a Senate base map that complies with the Florida Supreme Court's recent ruling and all of the relevant legal standards.
- Staff was instructed to develop multiple base maps applying two different methodologies in a memo from counsel dated September 22.
- The base maps were drafted solely by staff in collaboration with counsel, and were provided simultaneously to all legislators and the public on Wednesday, October 14.
- Except where consideration of political data is required to assess compliance with state and federal minority voting-rights provisions, staff avoided any assessment of the political implications of any map either before or during drafting the base maps, and has been instructed to continue do so through the end of the Special Session.
- During the drafting process, staff had no interactions with any member of the Legislature, a member's staff or aide, political consultants, or others concerning their work on the base maps.
- All of the draft maps, reports, and audio records of the base map drawing sessions were maintained and placed on the House and Senate redistricting web pages for public review.

## Methodologies for Drawing of Senate Base Maps

#### Methodology #1: Keep Counties Whole and Districts Entirely Within Counties

#### Tier 1 Principles:

- In drawing districts, avoid dilution or retrogression of voting strength in minority districts.
- In drawing districts, give no regard to partisanship or incumbency.

Tier 2 Principles: Should be adhered to except where Tier 1 principles require otherwise.

- In drawing districts, consistently respect county boundaries by keeping counties whole and keeping districts entirely within counties, where feasible.
- Where county lines cannot serve as the boundary of a district:
  - o Consistently respect municipal boundary lines and keep municipalities whole, where feasible.
  - Consistently follow other easily ascertainable and commonly understood geographic boundaries, such as railways, major roads, interstates, rivers and other major bodies of water, where feasible.
- Make districts as nearly as equal in population as practicable, with a maximum overall range of 4%.
- Districts shall be compact.

## Methodologies for Drawing of Senate Base Maps

#### Methodology #2: Minimize the Number of Times Each County is Split into More Than One District

#### Tier 1 Principles:

- In drawing districts, avoid dilution or retrogression of voting strength in minority districts.
- In drawing districts, give no regard to partisanship or incumbency.

Tier 2 Principles: Should be adhered to except where Tier 1 principles require otherwise.

- In drawing districts, consistently respect county boundaries by minimizing the number of times each county is split into more than one district, as well as aggregate number of county splits statewide, where feasible.
- Where county lines cannot serve as the boundary of a district:
  - Consistently respect municipal boundary lines and minimize the number of times a municipality is split into more than one district.
  - Consistently follow other easily ascertainable and commonly understood geographic boundaries, such as railways, major roads, interstates, rivers and other major bodies of water, where feasible.
- Make districts as nearly as equal in population as practicable, with a maximum overall range of 4%.
- Districts shall be compact.

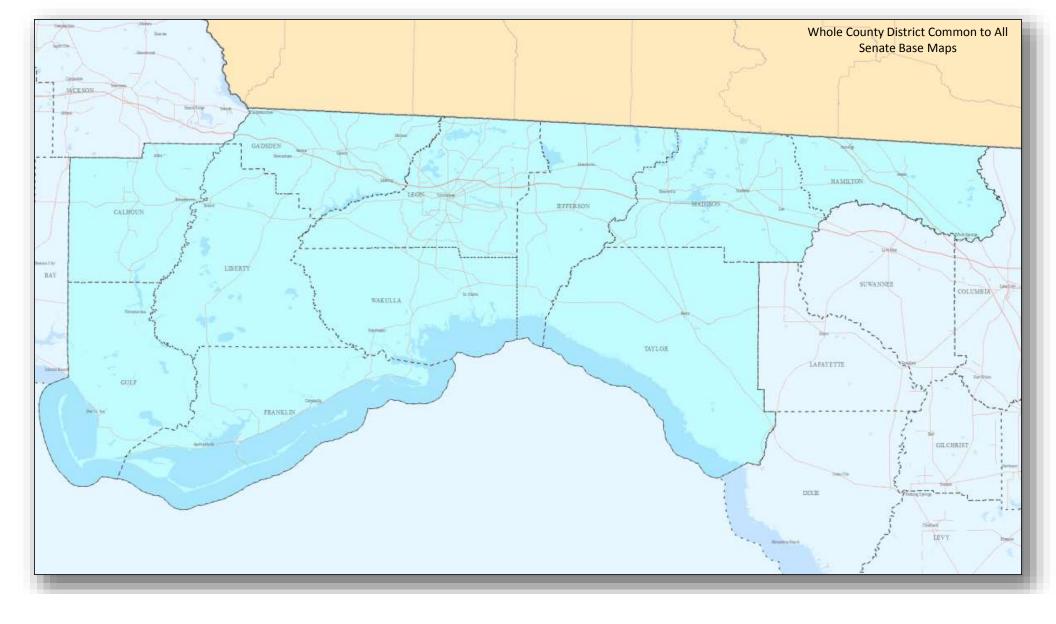

# Identifying Whole County Districts and "Sandboxes"

- A "whole county district" is a district made up entirely of one or more adjoining whole counties within the overall maximum range of 4%.
- A "Sandbox" is a set of adjoining counties with a total population that equals multiple districts within the overall maximum range of 4%, creating a new ideal population for a district within that "sandbox".
- Examples:
  - Whole County District
    - Pasco County = 464,697
    - 464,697 470,033 = -5,336 (-1.14%) = 1 District
  - "Sandbox"
    - Monroe, Miami-Dade, Broward and Palm Beach Counties = 5,637,725
    - 5,637,725 / 12 = 469,810
    - 469,810 470,033 = -223 (-0.047%) = 12 Districts

# Whole County District Common to All Base Maps

- District 3 11 Counties = 1 District
  - Calhoun, Franklin, Gadsden, Gulf, Hamilton, Jefferson, Leon, Liberty, Madison, Taylor and Wakulla.

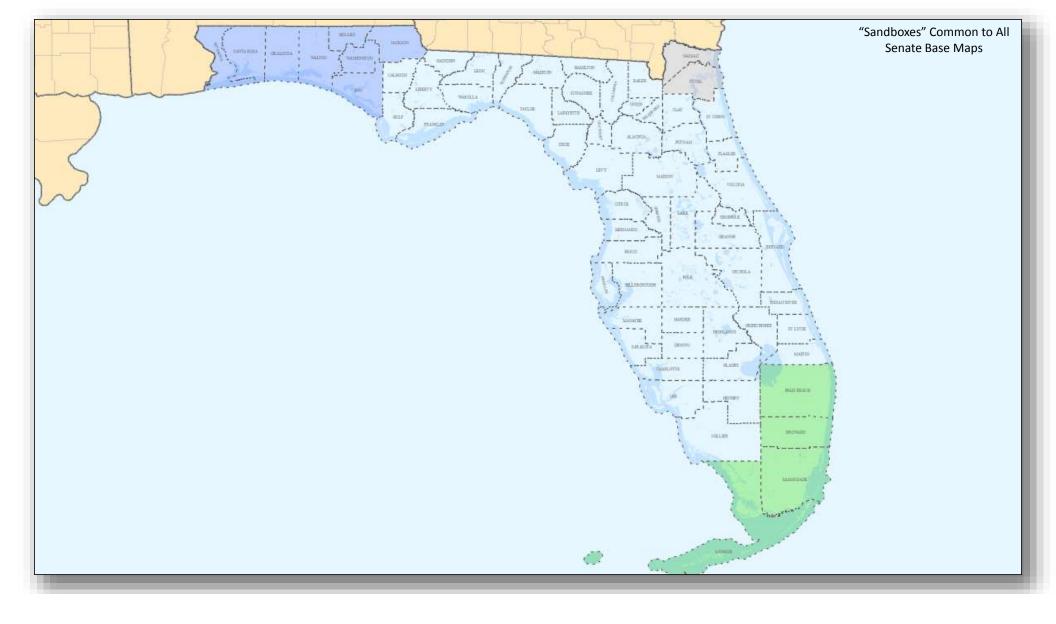

Common Whole County District	District 3
<b>Total Population</b>	474,408
Population Deviation	4,375
Population Deviation %	0.931%

# "Sandboxes" Common to All Base Maps

- West Panhandle 8 Counties = 2 Districts
  - Bay, Escambia, Holmes, Jackson, Okaloosa, Santa Rosa, Walton and Washington.
- Nassau/Duval 2 Counties = 2 Districts
  - Duval and Nassau
- South Florida 4 Counties = 12 Districts
  - Broward, Miami-Dade, Monroe and Palm Beach

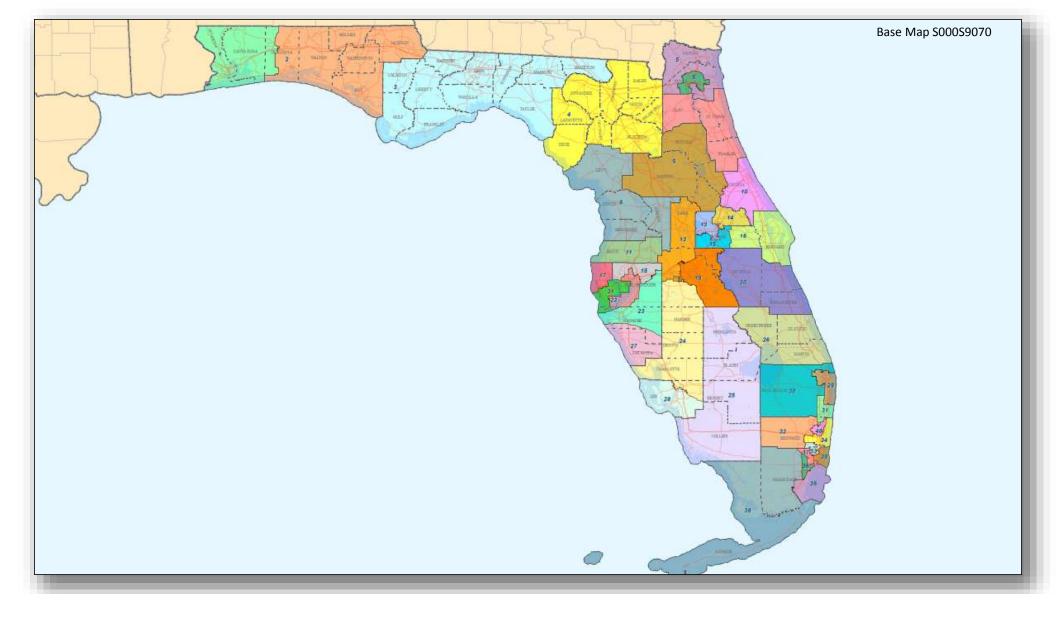

Common Sandboxes	West Panhandle	Nassau/ Duval	South Florida
Total SB Population	948,277	937,577	5,637,725
Districts within Sandbox	2	2	12
District Population within SB	474,139	468,789	469,810
Ideal Population Deviation	4,106	-1,245	-223
Ideal Population Deviation %	0.873%	-0.265%	-0.047%

# Presentation of the Six Base Maps

- Three that apply Methodology I
  - S000S9070
  - S000S9072
  - S000S9074
- Three that apply Methodology II
  - S000S9076
  - S000S9078
  - S000S9080

- Three different configurations of South Florida
  - S000S9070 and S000S9078
  - S000S9072 and S000S9076
  - S000S9074 and S000S9080
- Two different configurations of the Western Panhandle
  - S000S9070, S000S9072, and S000S9080
  - S000S9074, S000S9076, and S000S9078
- Two different configurations of the Nassau/Duval districts
  - S000S9070, S000S9076, and S000S9080
  - S000S9072, S000S9074, and S000S9078

#### Tier 1 Districts

- African-American Opportunity Districts
  - District 6
  - District 13
  - District 22
  - District 39
- African-American Minority-Majority Districts
  - District 33
  - District 40
- Hispanic Minority-Majority Districts
  - District 36
  - District 37
  - District 38

## Methodology 1

## Overall Population Deviation – 2.70%

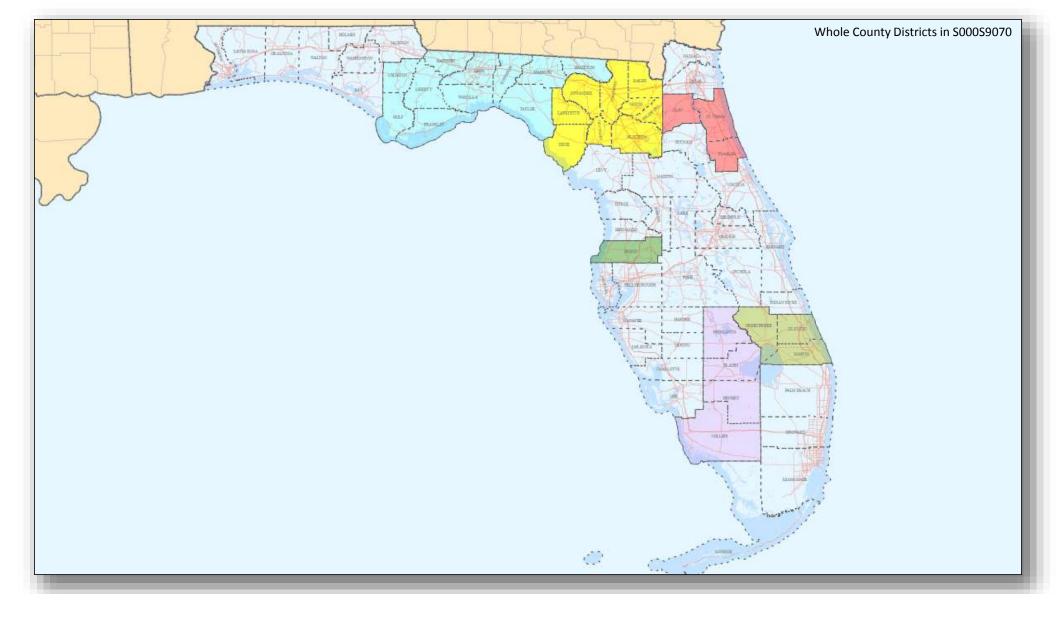

## Tier 2 Metrics: Compactness, Political Subdivisions, and Boundaries

9070	Average	Minimum	Maximum	Median	Standard Deviation
