The funds will enable proactive school shooter detection before shots are fired, saving time and lives. Schools are difficult to protect since they have large exterior spaces, many entry points, and limited resources for security technology and security personnel. ZeroEyes' active shooter detection technology uses artificial intelligence on existing security cameras to provide first responders with clear, accurate, and timely information, enabling them to respond more quickly and effectively.

b. What activities and services will be provided to meet the intended purpose of these funds?

-Assessment of Florida's Schools camera and network infrastructure
 -Deployment of server based gun detection software
 -24/7 human verification monitoring
 -troubleshooting / maintenance
 -quarterly software updates

c. What direct services will be provided to citizens by the appropriation project?

Early warning and proactionable data will be given to first responders to keep help citizens on Florida School grounds safe from gun related incidents

d. Who is the target population served by this project? How many individuals are expected to be served?

Deployment of ZeroEyes software is looking to serve all Florida students, staff, faculty, admin, as well as any sports spectators / visitors on school grounds

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

The ideal outcome of the ZE project would be to identify any firearm brandished on a Florida School property. To measure this, ZE will keep logs of all guns detected and verified over the one year project and deliver reports to FLDOE or any relevant entity.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for the contract?

In the event of a missed gun detection, ZE agrees to contract termination.
