**b. What activities and services will be provided to meet the intended purpose of these funds?**

The activity includes the construction of water quality treatment systems.

**c. What direct services will be provided to citizens by the appropriation project?**

This project will allow emergency stormwater pumps to operate during flooding emergencies.

**d. Who is the target population served by this project? How many individuals are expected to be served?**

The target population includes Miami Beach citizens and visitors. Miami Beach is a world class destination. In addition to the 80,000+ residents, each year the City hosts 3.1 million overnight visitors.

**e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?**

Enhanced protection to our citizens, residents and property against coastal erosion and flooding. The city will monitor the height of the water via tidal gauges and visually inspect for any evidence of flooding after storms, high tides and significant rain events.

**f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for the contract?**

Penalties include termination of contract and potential debarment pursuant to Miami Beach City Code.
