## The Florida Senate Local Funding Initiative Request Fiscal Year 2023-2024

LFIR # 1163

Total State Funds Requested (must equal total from question #6)

100,000

#### 14. Program Performance

a. What specific purpose or goal will be achieved by the funds requested?

The specific goals of the funds requested are to improve school attendance, reduce dropout rates, increase graduation rates, reduce relapse, improve mental health, reduce the cost to society, and improve emotional wellness and self-regulation of our students.

b. What activities and services will be provided to meet the intended purpose of these funds?

The activities and services that will be provided include mental health services and recovery support while supporting students to achieve their academic goals. Students and families will receive case management, academic support, assistance to increase recovery capital, assistance to increase social and emotional skills, and assistance in finding clinical support.

c. What direct services will be provided to citizens by the appropriation project?

Students will be provided with daily mental health checks, opportunities for students to receive one on one support, and participate in daily groups. A few of the focus areas of this time together include meditation, music therapy, setting SMART Goals, learning about multiple pathways to recovery, wellness Wednesday (exploring the 8 dimensions of wellness identified by the Substance Abuse and Mental Health Service Administration), recurring assessments of recovery capital, and ways to increase it. By providing an environment that is supportive and celebratory of one another's accomplishments, students will benefit by positive reinforcement and recover successfully. Caregivers will be provided individual support as requested and group connections will be provided through monthly caregiver connection groups. Caregivers will be invited to join a social media group to regularly connect with other caregivers and our caregiver support specialist.

d. Who is the target population served by this project? How many individuals are expected to be served?

The target population served by this project are adolescents aged 14-19 who are ready and willing to work a program of recovery from substance use and co-occurring disorders. Additionally, the target population of this project includes caregivers whose adolescents are working a program of recovery and parents of adolescents who are struggling with substance use and co-occurring disorders. It is expected that 25 students will be served over the year and a minimum of 25 caregivers, for a total of 50 individuals.

## e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

- 1) Improve School Attendance Rate School attendance for students will be improved by 80% or higher. This will be recorded daily.
- 2) Increase Participation in Mental Health and Recovery Supports 100% of students will receive mental health and recovery support. As documented above in letter C, students will be provided daily support on multiple topics to foster their mental health and recovery. This will be tracked along with attendance.
- 3) Academics 100% of students will progress academically. Students will be provided a structured schedule to work on their individualized academics. Staff monitor this daily and provide regular communication to students and caregivers of academic progress.
- 4) Increase Recovery Rate 60% or higher recovery rate. This will be monitored by random drug screens and by examining and improving each student's recovery capital.
- f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for the contract?
