4. Project/Program Description

Thomas Creek borders between Nassau and Duval Counties. The Watershed is historically plagued within Nassau County for flood damage and many repetitive loss properties. Thomas Creek is also the headwaters of the State of Florida designated Nassau River - St. Johns River Marshes Aquatic Preserve. From 2008 to 2018 the County, in collaboration with the Florida Department of Environmental Protection, executed a desnagging project at a cost of \$3,340,000. The desnagging project only provided short-term relief. From 2019 to 2022 Nassau County partnered with Us Army Corps of Engineers to execute a Planning Assistance to States (PAS) Study. The findings of the 2-year study were presented to the Nassau County BOCC in June of 2022. The study found the only viable long-term solution was to remove structures from the floodplain and return to lands to their natural state. This project will focus on land acquisition and demolition of all man made structures.

Fiscal Year 2024-2025

LFIR # 1905

Consists of the acquisition, home demolition, and septic system removal of the most vulnerable properties within the Thomas Creek basin. This project removes septic tanks from the headwaters of Nassau River - St. Johns River Marshes Aquatic Preserve, and repetitive loss properties from the State of Florida thus having a positive impact on property insurance liabilities. A secondary impact of reestablishing the floodplain is a positive influence on drainage in the Thomas Creek Watershed.

b. What activities and services will be provided to meet the intended purpose of these funds?

There are over 4,000 parcels within the Thomas Creek Watershed that will be directly or indirectly impacted by this improvement.

c. What direct services will be provided to citizens by the appropriation project?

Demolition of homes, septic, and structures along with reclamation as needed of the floodplain. Nassau County BOCC will also acquire the land to maintain the floodplain in its natural state.

d. Who is the target population served by this project? How many individuals are expected to be served?

Parcels located within Thomas Creek Flood Plain. 4,000 Parcels.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

Septic and Structure removal from floodplain. Citizens no longer in danger of floodwaters in their homes or properties.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for the contract?

Standard contract penalties are sufficient.
