### 11. Program Performance

a. What specific purpose or goal will be achieved by the funds requested?

The goals of CCM are to (1) reduce risk factors leading to deeper juvenile justice system involvement and interrupt the revolving door of girls who cycle in and out due to unaddressed mental/behavioral health needs; (2) increase access to community-based girl-centered therapeutic services deliberately designed to address factors that put girls at risk of incarceration; (3) provide interventions at multiple points to interrupt the pathway for girls who are at risk of suspension, on probation, in detention, in court, in residential placement or transitioning back to the local community; (4) interrupt pathways of abuse and trauma that lead to girls' internalizing (e.g., suicide ideation, self mutilation) and externalizing behaviors (e.g., running away, delinquency).

- b. What activities and services will be provided to meet the intended purpose of these funds?
  - 1. Girl-Centered Counseling: Individual/family counseling focused on root causes. Individualized sessions take place where the girls/families are (office, home, school, community, etc.)
  - 2. Mobile Care Management/Crisis Intervention (on-call 24/7/365). Advocacy to access resources (psychological testing, medication management, health care, pro bono legal services, tutoring, scholarships, employment, housing, clothing, food, childcare, etc.) mentoring, advocacy in court proceeding, multi-disciplinary staffings. 3. Intervention in School: On site individualized intervention (as appropriate) which includes individualized care management and referrals for services, skills building, mentoring and or advocacy within the school regarding academic and disciplinary matters. 4. Detention Center Services: SAVVY enrichment group sessions for skill building in safety, communication, emotions, etc. 5. Transitional Services:
- c. What direct services will be provided to citizens by the appropriation project?

The Girl Matters: Continuity of Care services are designed to improve public safety by addressing the root causes that put girls on a track to justice involvement. Direct services include intensive intervention supports to under served at risk girls and their families living in high risk/under resourced neighborhoods. We collaborate with law enforcement, judges, state attorney, public defenders and support their efforts to reduce juvenile crime, which directly benefits citizens by decreasing crime and creating safer communities. In-school services directly support our local schools by modeling effective interventions that reduce suspensions. Business owners benefit through the placement of girls as effective employees. Citizens benefit by the improved public safety and better use of tax dollars. The girls benefit by having the opportunity to be contributing citizens. Attached letters from State Attorney, Sheriff, Public Defender, Judge, Health Systems, System of Care & citizen leaders.

d. Who is the target population served by this project? How many individuals are expected to be served?

Girls between the ages of 5-17 who are in - or at risk of entering - the justice system, and their family members living in Florida's First Coast (Duval, Baker, St. Johns, Nassau and Clay Counties). 63 girls will receive intensive therapeutic services and an additional 100 girls will be served through groups at the detention center during the project year. It is noteworthy that girls in the First Coast region reported greater risk factors than girls statewide in every category-physical and sexual abuse, mental health needs, self mutilation, suicidal ideation and attempts, and family risk factors on the DJJ PACT Assessment.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

Improved mental health: 100% will have access to individualized counseling and therapeutic interventions; 90% will demonstrate improved mental health as evidenced by reduced risk and need scores in the Mental Health Domains as measured by the DJJ Prevention Assessment Tool (PAT); 90% will avoid arrests for new criminal offenses as evidenced by regular Juvenile Justice Information System (JJIS)reports; 90% will be diverted from residential commitment and receive community based services. JJIS is utilized to document participant's criminal status upon intake and exit for each program year. The Policy Center research team measures girl's perceptions of social support by calculating the number and percent of youth exhibiting desired change divided by the number of completions.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for in the contract?

Suggested penalties for failing to meet deliverables provided for in the contract is a reduction in the amount of the monthly payment after finding substantial evidence of non-delivery of service(s) as required by the Contract. The suggested penalty for failing to meet performance measures provided for in the contract is a review of the deficiency to determine if it is critical, major, or minor. If it is a critical deficiency or minor deficiency, the opportunity to work with prevention staff to correct and close out the deficiency. If it is a major deficiency, an Outcome Based Corrective Action Plan will be created and submitted to the Department for review and approval.
