## Local Funding Initiative Request

### Fiscal Year 2020-2021

LFIR # 2221

1. **Project Title**
2. **Senate Sponsor**
3. **Date of Request**

4. **Project/Program Description**

The CR 280A Connector Road project will consist of engineering, survey, design, permitting, construction, and CEI of an approximate 1.74 mile roadway. The new roadway would serve to connect US Hwy 331 to CR 280A. The proposed roadway would provide (2) 12' foot travel lanes for a total roadway width of 24' feet. The roadway and associated stormwater infrastructure will be constructed within a 100' foot wide right of way. The project would include construction of at least one roadway bridge and a number of wetland crossings which will be finalized as part of the design and permitting process.

## 11. Program Performance

- a. What specific purpose or goal will be achieved by the funds requested?

This area of Walton County southeast of DeFuniak Springs does not have direct access to US Hwy 331 which serves as the primary north-south arterial highway in Walton County. The CR 280A Connector Road would allow the traveling public a more convenient and direct route to US Hwy 331, relieve traffic congestion on US Hwy 331, reduce emergency response times to area citizens, provide a safer travel corridor, and decrease the travel times required to access the only hospital in north Walton County. This roadway project would also encourage economic development in and around the project.

- b. What activities and services will be provided to meet the intended purpose of these funds?

Construction of roadway and bridge.

- c. What direct services will be provided to citizens by the appropriation project?

The CR 280A Connector Road project would provide direct services to citizens by providing a more convenient and safer route to US Hwy 331. This would improve emergency response times and reduce travel time for citizens to the only hospital in north Walton County. This project would also encourage economical development in and around the project.

- d. Who is the target population served by this project? How many individuals are expected to be served?

General public.

- e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

The project benefits would be reduced travel times for area citizens in need of services, safer travel corridor, quicker emergency response times, and potential economic development. The outcome would be measured by the reduction in travel and response times as well as new job opportunities associated with future economic development along the new road corridor.

- f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for in the contract?

Standard contract penalties are sufficient.
