Local Funding Initiative Request

Fiscal Year 2020-2021

LFIR # 2323

1. **Project Title**
2. **Senate Sponsor**
3. **Date of Request**

4. **Project/Program Description**

During severe rain events, the area experiences structural inundation which is caused by a series of undersized storm drains and conveyance canal between Park at Sorrento (aka. Woodside) Apt. and the outfall at Shingle Creek. Funds will pay for the construction of the project which in turn will alleviate the flooding issues for this community. More than 1,000 residents live in this area; with 208 units of affordable housing for low income families located directly in the lowest lying area. This project will address these flooding issues by reconstructing the drainage system to accommodate the storm water runoff in three phases. During the last Hurricane (Irma), floodwaters entered residences and flooded bathtubs and many families were displaced.

11. Program Performance

- a. What specific purpose or goal will be achieved by the funds requested?

During sever weather, the area experiences structural inundation which are caused by series of undersized storm drains and conveyance canal between Park at Sorrento (aka. Woodside) Apartment and the outfall at Shingle Creek. The request is for funds to construct the project which in turn will alleviate the flooding issues for vital affordable multifamily rental units in Kissimmee.

- b. What activities and services will be provided to meet the intended purpose of these funds?

Improvement in storm water collection and improvement in outfall quality before entering Shingle Creek. Reduction of cost burden due to damages, loss of property, loss of use, and relocation to low income residents in this area.

- c. What direct services will be provided to citizens by the appropriation project?

This project will alleviate flooding in this community which will result in the elimination of displacement of low income residents during heavy rains associated with major storm events. Major flooding has occurred on more than three occasions in the past 10 years.

- d. Who is the target population served by this project? How many individuals are expected to be served?

More than 1,000 residents live in this area; with 208 units of affordable housing for low income families located directly in the lowest lying area.

- e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

Environmental, loss of property and general health concerns are paramount to mitigating the impacts of flooding in this area. Older homes, low income housing, low lying areas and additional storm water runoff due to build out, will be mitigated. Data collection and monitoring in conjunction with the City's Stormwater Management Program.

- f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for in the contract?

Currently in our City contracts we have a provision for liquidated damages to ensure projects are completed within schedule.
