#### 12. Program Performance

##### a. What specific purpose or goal will be achieved by the funds requested?

Jacob City is between the City of Graceville and the City of Marianna. The fire station that will go in the City of Jacob will accommodate those that reside in the city limits of Jacob and those that are on the outskirts of town and in between the adjacent cities. It will also assist emergency situations along the northern part of US Hwy 231 in Jackson County.

##### b. What activities and services will be provided to meet the intended purpose of these funds?

The fire station will provide services to the City and County in case of an emergency.

##### c. What direct services will be provided to citizens by the appropriation project?

Currently, there is no fire station and thus the citizens of Jacob would be vulnerable if a fire were to break out. A fire station will greatly decrease the waiting time for a 911 emergency if a fire station were to be placed in the city. It will allow a quicker response time to emergencies for the citizens in the area.

##### d. Who is the target population served by this project? How many individuals are expected to be served?

The fire station will service the entire city in case of an emergency, as well as others in surrounding cities within the county.

##### e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

This project will protect the general public from harm by shortening the wait time from 911 in case of an emergency.

##### f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for the contract?

The Auditor General conducts audits for both city and state agencies.
