12. Program Performance

a. What specific purpose or goal will be achieved by the funds requested?

The purpose of this project is the implementation of a land application system for Blountstown WWTP. This will also satisfy the requirements of the existing Consent and Administrative Orders and improve surface water quality in Sutton Creek, a tributary of the Apalachicola River.

b. What activities and services will be provided to meet the intended purpose of these funds?

These funds will allow for land acquisition, design, and construction of an effluent land application system for the City of Blountstown's WWTP. This will allow the City to meet the stipulations of the Consent and Administrative Orders from FDEP to eliminate their existing surface water discharge of treated effluent to Sutton Creek, a tributary of the Apalachicola River.

c. What direct services will be provided to citizens by the appropriation project?

This project will eliminate surface water discharge to Sutton Creek, a tributary of the Apalachicola River. This should decrease local surface water quality issues associated with the existing effluent discharge to Sutton Creek.

d. Who is the target population served by this project? How many individuals are expected to be served?

This project should provide benefits to the general population of the City of Blountstown as well as any other individuals who utilize the Apalachicola River. The City services approximately 2,800 people with sewer.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

It is expected that this project will improve surface water quality by removing the existing outfall to Sutton Creek. This outcome can be measured by surface water sampling.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for the contract?
