1. Project Title	San Antonio Sto	rmwater Manage	ement		
2. Senate Sponsor	Danny Burgess				
·					
3. Date of Request	01/03/2022				
4. Project/Program D	escription				
regrading of existing	swales. clearing. r	epairing, and upo	in Antonio city limits. Pr grading existing culverts ncerns in residential are	s ánd other permane	ncluding clearing and ent drainage structures.
5. State Agency to re	ceive requested fu	ınds Depar	tment of Environmental	Protection	
State Agency conta		for Fiscal Year	2022-2023		
Type of Funding				ount	1
Operations			7	10,000	
Fixed Capital Outlay	/			590,000	7
Total State Funds				600,000	
Type of Funding Total State Funds Requested (from question #6)			Amount 600,000	Percentage 98%	
	lequested (from que	estion #6)	600,000	98%	-
Matching Funds			0	0%	1
Federal State (excluding the amount of this request)			0	0%	7
Local	amount of this requ	ucoty	10,000	2%	
Other			0	0%	7
Total Project Costs for Fiscal Year 2022-2023			610,000	100%	
8. Has this project pr	eviously received	state funding?	No		
Fiscal Year	Ame	ount	Specific	1	
(уууу-уу)	Recurring	Nonrecurring	Appropriation #		
9. Is future funding lil	kely to be request	ed?	No		J
a. If yes, indicate nonrecurring amount per year.]
•	_				_
b. Describe the so	urce of funding the	at can be used in	n lieu of state funding	-	٦
10. Has the entity req	uesting this proie	ct received anv	federal assistance rel	ated to the COVID-	-19 pandemic?
No	, J - 1 1-				•
If yes, indicate the	amount of funds	received and wh	nat the funds were use	ed for.

11. Details on how the rec	quested state funds	will be expended

Spending Category	Description	Amount
Administrative Costs:		
Executive Director/Project Head Salary and Benefits		0
Other Salary and Benefits		0
Expense/Equipment/Travel/Supplies/ Other		0
Consultants/Contracted Services/Study	Administrative costs will be incurred by legal counsel for drafting of contacts awarded to potential bidders for work on the project. Additional assistance will be required for documentation such as warranties and bonds on construction.	10,000
Operational Costs: Other		
Salary and Benefits		0
Expense/Equipment/Travel/Supplies/ Other		0
Consultants/Contracted Services/Study		0
Fixed Capital Construction/Majo	r Renovation:	
Construction/Renovation/Land/ Planning Engineering	An engineering consultant will be retained to review proposed grading and construction plans for drainage structures. The consultant will also assist with preparing necessary bid documents with reference to the scope of work. On site inspections throughout the construction process will also be required. Preliminary estimates for materials are 400,000, including riprap/shot rock, PVC to replace galvanized piping, and concrete for culvert construction.	590,000
Total State Funds Requested (m	ust equal total from question #6)	600,000

12. Program Performance

a. What specific purpose or goal will be achieved by the funds requested?

Existing drainage structures that have become less efficient over time due to weather, vegetative growth, construction, and normal wear and tear will be rehabilitated to minimize pooling water in residential areas. Optimized drainage structures will allow for more consistent drainage into designated areas, and will allow for more efficient maintenance by city staff in the future. Integrity of structures such as roads, sidewalks, and residential driveways will be prolonged with stormwater draining as anticipated.

b. What activities and services will be provided to meet the intended purpose of these funds?

Throughout the construction process, and upon completion, San Antonio Public Works Department will continue with regular maintenance of the rehabilitated structures to ensure the structures remain operation and maintained to mitigate damage.

c. What direct services will be provided to citizens by the appropriation project?

Citizens will benefit from enhanced stormwater structures. Residents in the target areas will see reduced risk of damage to personal property due to standing water. During times of heavy rain, decreased stormwater will collect on public roadways and reduce travel limitations

d. Who is the target population served by this project? How many individuals are expected to be served?

The target population is the general population of San Antonio residents, not restricted to those residing in the target areas due to the availability of public roadways.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will

LFIR # 1974

be measured?

Expected benefits will include ease of future maintenance of swales and culverts and other structures, along with decreased need for large scale rehabilitation projects or repairs to roads or other structures as a result of standing stormwater. Measurement of outcomes can be determined by comparing annual maintenance costs in the target area over time. Additional verification of successful drainage flows may be able to be verified through studies performed by the city's retained engineering consultant, with additional data available in the form of engineered plans and topographical maps of the area.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for the contract?

Failure to meet deliverables as outlined in agreements between the city and other parties associated with the project will lead to penalties such as withholding of payments. Anticipated deadlines would be agreed upon prior to commencement of work on a project to ensure compliance, along with requirements to submit proof of progress throughout construction.

13. The owners of the facility to receive, directly or indirectly, any fixed capital outlay funding. Include the relationship between the owners of the facility and the entity.

The City of San Antonio, Florida would remain the sole owner.

Please complete the questions below for Water Projects only.

17. F	lave you applied for alternative state funding?
	☐ Waste Water Revolving Loan
	☐ Drinking Water Revolving Loan
	□ Small Community Wastewater Treatment Grant
	☐ Other (please specify)
	☑ N/A
18. V	Vhat is the population economic status?
	☐ Financially Disadvantaged Community (ch. 62-552, F.A.C)
	☐ Financially Disadvantaged Municipality (ch. 62-552, F.A.C)
	□ Rural Area of Economic Concern
	☐ Rural Area of Opportunity (s. 288.0656, Florida Statutes)
	☑ N/A
19. V	Vhat is the status of construction?
	No Commencement
20. V	Vhat percentage of the construction has been completed?
	0
21. V	What is the estimated completion date of construction?
	09/30/2023
