Construction/Renovation/Land/ Planning Engineering	Fixed capital construction, planning, and engineering.	500,000					
Total State Funds Requested (must equal total from question #6) 500,000							

### 12. Program Performance

a. What specific purpose or goal will be achieved by the funds requested?

The project has raised significant capital. Groundbreaking for the project was held October 21. Funds will further the goal of building an innovative and interactive children's museum in St. Augustine, designed to engage a curious and creative community. The museum will serve as a community hub for STEAM-based educational resources for parents and educational institutions. This will be the first cultural institution developed in the region in 20 years.

b. What activities and services will be provided to meet the intended purpose of these funds?

Children's museum programs and hands on activities focused on STEAM education. tag! focuses on 5 key areas of influence to inspire young people, ignite interest, and create responsible, inquisitive, informed future adults - environmental stewardship, history and culture, health and wellness, STEAM, and citizenship and compassion. Children will learn through play.

c. What direct services will be provided to citizens by the appropriation project?

Direct services to children and young people by providing out of school learning, professional development for teachers, and services to children with disabilities and who learn differently. tag! has partnered with social service agencies and businesses to achieve these goals. tag! will be a destination for field trips, a resource for teacher professional development, and an opportunity for after school tutoring. The hands-on learning opportunities will be varied to build on life skills and academics.

d. Who is the target population served by this project? How many individuals are expected to be served?

Children and families. 85,000 individuals will visit annually.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

LFIR # 2084

Children's museums help children develop essential foundational skills. Grounded in well-established pedagogy, children's museums are leading a movement that combines specific learning objectives with play in informal learning environments that are developmentally appropriate for infants, toddlers, and children. Local museums are able to provide a sense of community and place by celebrating a collective heritage, offering a great way to get to know the history of a particular area. Data on where visitors are coming from in the 5 county area will support research on the impact.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for the contract?

Standard contract penalties are sufficient.

13. The owners of the facility to receive, directly or indirectly, any fixed capital outlay funding. Include the relationship between the owners of the facility and the entity.
