If yes, indicate the amount of funds received and what the funds were used for.

Okaloosa County BCC has expended approximately \$37 million in federal assistance for a variety of costs as a result of COVID.

11. Details on how the requested state funds will be expended

Spending Category	Description	Amount					
Administrative Costs:							
Executive Director/Project Head Salary and Benefits		0					
Other Salary and Benefits		0					
Expense/Equipment/Travel/Supplies/ Other		0					
Consultants/Contracted Services/Study		0					
Operational Costs: Other							
Salary and Benefits		0

Consultants/Contracted Services/Study		0					
Fixed Capital Construction/Majo	r Renovation:						
Construction/Renovation/Land/ Planning Engineering	Construction	1,500,000					
Fotal State Funds Requested (must equal total from question #6) 1,500,000							

12. Program Performance

a. What specific purpose or goal will be achieved by the funds requested?

A new elevated storage tank is needed in order to have sufficient water available for all existing and future uses of the system. The West County public water supply wells, located in the Water Resource Caution Area, were taken out of service out of concern for the Floridan Aquifer cone of depression and long-term concerns of saltwater intrusion. The new elevated storage tank will strengthen the County's critical infrastructure, enhance resiliency, and prepare for future supply demand. It will better prepare the County for emergencies and a second elevated tank is needed for additional storage, fire protection, and sustaining pressure.

b. What activities and services will be provided to meet the intended purpose of these funds?

The funds will be used for the construction of a new elevated storage tank to provide additional potable water storage capacity in a low lying coastal area prone to tropical weather events, increased fire protection capacity, and sustained pressure to the customers in the West County Service area in Okaloosa County.

c. What direct services will be provided to citizens by the appropriation project?

The direct services of more than doubling the elevated potable water storage capacity for County West customers includes increased fire protection capacity, sustained pressure during main breaks and fires (reducing the inconvenience of boil water notices), as well as enhanced resiliency during the period immediately following tropical events with major power outages.

d. Who is the target population served by this project? How many individuals are expected to be served?

All population of West Okaloosa County Water and Sewer service connections. Currently, there are approximately 3,500 connections to the system with an average of 2.6 person per connection for an approximate population of 9,100 residents.

LFIR # 2673

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

Protect the general public health from harm, improve ground water quality, improve drinking water quality, and enhance, preserve, and improve environmental quality by boosting efficiency of water resources. This project will reduce the reliance on the coastal portion of the Floridan Aquifer while adding system interconnections and water storage capacity. Currently, Okaloosa County is within Region II of the Northwest Florida Water Management District (NWFWMD). Since Region II is the largest and fastest growing water supply planning region in the District, a regional water supply plan is released yearly to evaluate the conditions of operations. The outcome will be measured by the following:

- Direct increase in water supply capacity;
- Sustainability of water pressure and flow into the West County Service area;
- Reduction of Water Boil Notices; and
- Positive changes in hydrologic data (rise in potentiometric surface of the local Floridan Aquifer, etc.)
- f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for the contract?

Standard contract penalties and/or revocation of grant funds to be considered for failing to meet deliverables or performance standards.

13. The owners of the facility to receive, directly or indirectly, any fixed capital outlay funding. Include the relationship between the owners of the facility and the entity.

Okaloosa County Water & Sewer Okaloosa County Local Government

Please complete the questions below for Water Projects only.

17. H	ave you applied for alternative state funding?
	□ Waste Water Revolving Loan
	☐ Drinking Water Revolving Loan
	□ Small Community Wastewater Treatment Grant
	☐ Other (please specify)
	☑ N/A
18. W	hat is the population economic status?
	☐ Financially Disadvantaged Community (ch. 62-552, F.A.C)
	☐ Financially Disadvantaged Municipality (ch. 62-552, F.A.C)
	□ Rural Area of Economic Concern
	☐ Rural Area of Opportunity (s. 288.0656, Florida Statutes)
	☑ N/A
19. W	/hat is the status of construction?
	Not Ready
20. V	hat percentage of the construction has been completed?
	0
21. W	hat is the estimated completion date of construction?
	09/30/2025
