2. **Senate Sponsor**
3. **Date of Request**

4. Project/Program Description

The City of Port Orange utility extends east of the Halifax River to the barrier island to provide service to the neighboring communities of Ponce Inlet, Daytona Beach Shores, and unincorporated Wilbur by the Sea. The City provides sewer services through a single 20" pipeline that extends under the river. This ductile iron pipe was installed over 30 years ago (1986). There is no secondary service line. Recent breaks of this line on the mainland caused concern for the condition of this infrastructure. The City needs to install a second Force Main under the river to provide more reliable and redundant service, ensure sufficient capacity for new customers, and reduce the environmental concerns of breaks, which are challenging to solve under the river. In future phases, once the second line is installed the City plans to clean and line the existing pipeline to serve as a backup. The sewer system is currently in the design and permitting/surveying stage.

b. What activities and services will be provided to meet the intended purpose of these funds?

This funding will be utilized for construction costs related to the sewer force main installation.

c. What direct services will be provided to citizens by the appropriation project?

The secondary line will allow for more reliable and redundant services to multiple communities, ensure sufficient capacity for new customers, and reduce the environmental concerns of potential breaks which could result in accidental discharge to the Halifax River.

d. Who is the target population served by this project? How many individuals are expected to be served?

The residents of Port Orange who live across the bridge, Ponce Inlet, and Daytona Beach Shores will be impacted by this project. There are an estimated 11,000+ residents in these communities. In addition, there are businesses served in this area.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

Success will be measured by the completion of the project and reducing the number of breaks and out of service dates.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for the contract?

Potential penalties for failing to meet deliverables or performance measures may include withholding of funds until deliverables and performance measures are met.
