Fixed Capital Construction/Majo	r Renovation:			
Construction/Renovation/Land/ Planning Engineering		0		
Total State Funds Requested (must equal total from question #6) 1,000,000				

#### 14. Program Performance

a. What specific purpose or goal will be achieved by the funds requested?

LFIR # 1953

The NAMI Alliance provides essential education, advocacy, and support programs at no cost for youth/young adults, individuals, families, and caregivers with mental illness/co-occurring diagnoses. NAMI's volunteer/peer-led programs combat the cycle of untreated mental health challenges that lead to long-lasting impacts in adulthood such as homelessness, incarceration, and recidivism. NAMI's approach encompasses the individual and their loved ones by offering multiple access points to receive mental health support. These programs are an integral part of the mental health continuum of care that includes prevention/early intervention, treatment, and support to increase overall wellness and recovery.

#### b. What activities and services will be provided to meet the intended purpose of these funds?

The funds will be used to increase NAMI Alliance outreach, early intervention, support, education, and system navigation services to youth, young adults, adults, families, and loved ones which is provided at no cost to participants. The programs provide outstanding free education, skills training, and support services to anyone affected by mental health/cooccurring challenges. One in 5 adults experience mental illness each year; 1 in 6 U.S. youth ages 6-17 experience a mental health disorder each year, and even more families are affected by a loved one's mental illness. NAMI's Family and Peer Support Alliance engages through advocacy, education, support, and public awareness.

#### c. What direct services will be provided to citizens by the appropriation project?

Funding will support the free programs offered through the NAMI Family and Peer Alliance members and led by trained program leaders with personal experience of mental illness/substance use disorders. Evidenced-based programs include Family-to-Family education, drop-in Family Support Groups, Basics education classes for families of young children, a Family & Friends seminar, Ending the Silence for Families of middle and high school aged children, Peer-to-Peer education, drop-in Connection Recovery Support Groups, In Our Own Voice workshops to help individuals seeking recovery, and Ending the Silence for Students which focuses on suicide awareness, early warning signs, and how to seek help.

#### d. Who is the target population served by this project? How many individuals are expected to be served?

NAMI's free programs are available to any individual impacted by mental illness/co-occurring substance use regardless of race, age, or economic status. Individuals living with mental illness are often without income, insurance, or family support. The NAMI Family and Peer Support Alliance serves individuals in more than 15 urban and rural counties, and even more through virtual programs. We deliver evidenced-based prevention and care for youth, young adults, adults, and families that supplement traditional behavioral health services. Based on outreach, we anticipate serving more than 50,000 citizens throughout Florida.

### e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

According to NAMI National, the average delay between onset of mental illness symptoms and treatment is 11 years. Suicide is the second leading cause of death (10-14) and third among those 15-24. Education and support are critical elements to stop this trend. Success will be measured by an increased number of community members receiving free services, such as classes, support groups, and community outreach presentations. Evaluations are completed after the programs, and measurable outcomes include individual/family member gains focused on managing crisis situations, reduced stress and/or isolation, access to needed treatment and/or support, and an understanding of signs and symptoms.

### f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for the contract?
