#### 14. Program Performance

Planning Engineering

Construction/Renovation/Land/

Fixed Capital Construction/Major Renovation:

a. What specific purpose or goal will be achieved by the funds requested?

Total State Funds Requested (must equal total from question #6)

## The Florida Senate Local Funding Initiative Request Fiscal Year 2023-2024

LFIR # 2016

This request would support the creation and operations of the College and will establish the infrastructure for the College to include the hiring of a founding dean, associate dean for student affairs, assistant dean of curriculum, senior faculty, and administrative personnel. We will also hire an assistant dean of admissions and staff to support student recruitment goals and faculty, administrative and supporting staff. We will hire a focused consulting firm to expedite accreditation, purchase learning tools and equipment and create scholarships and incentives to encourage professional service in rural and underserved areas after graduation.

#### b. What activities and services will be provided to meet the intended purpose of these funds?

In addition to standardized patient clinical program requirements, dental care clinic experiences will be operationalized throughout FAU's service area with full and affiliate faculty members, similar to the clinical rotations provided by our College of Medicine and College of Nursing. The College of Dentistry also will partner with public and private partners in the FAU Health Network. The College of Dentistry is an essential component of FAU Health Network's mission to best serve the growing population of Florida. Further, the clinical, education and research opportunities will enhance Florida's life sciences sector, boosting its workforce and related economic impact.

#### c. What direct services will be provided to citizens by the appropriation project?

FAU Health Network aims to best serve the healthcare needs of the population of the region and of Florida through education, research integration, and interprofessional practice. The proposed College of Dentistry will be a key pillar in this foundation of care delivery, providing a pipeline of highly trained dental professionals who are well equipped to serve the community, with a focus on service in rural and underserved areas. We will work collaboratively with the region's 12 dental hygiene programs to provide additional clinical rotation opportunities.

#### d. Who is the target population served by this project? How many individuals are expected to be served?

Between 80-90% of the dental students that train in Florida remain in Florida, and this will have a tremendous impact on the number of dentists available to serve in the state. Focusing the curriculum on serving the underserved will benefit the 63 counties that have a shortage of dental providers and in FAU's service area of Palm Beach, Broward, Martin, St. Lucie, and Indian River counties. We anticipate serving ~31k individuals in collaboration with the Heartlands Rural Health Network, and anticipate providing care for over 65k patients through a partnership with the Central Florida Healthcare Group.

### e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

The primary educational outcomes of the proposed programs include student enrollment and graduation numbers. The primary workforce outcomes include the number and percentage of students who successfully pass the National Board Dental Examination and enter the dental workforce in Florida, specifically in underserved areas of the state. This program will increase the number of dental graduates, and will recruit students likely to stay in the region as they develop ties to the community that will further increase the likelihood of retention. The expected ROI include increases in the number of dentists, as well as allied dental professionals, such as dental hygienists and assistants, that are added to Florida's workforce.

### f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for the contract?

If Florida Atlantic University does not execute the plan as proposed, the state of Florida may relinquish all funds associated with this request.
