The State funding is an eminent part of this programs, especially after Covid-19, when local funding, and corporate donations are more difficult to attain. Also, our consumers cannot self-afford the cost from a private academy. Approximately 95% of the consumers we serve come from Low Income households. The pandemic has affected our consumers much harder than the general citizen, being they have many challenges, physically and health related. We urge the Senate to grant us this appropriation

10. Has the entity requesting this project received any federal assistance related to the COVID-19 pandemic?

If yes, indicate the amount of funds received and what the funds were used for.

ADE received \$606,548 of PPP. Funds were spent to maintain ADE's employees and subsidize programming costs during the pandemic. Our agency offers ADT, Supported Employment, and Transportation. APD only reimbursed ADT Waiver providers for physical or virtual services. Parents were afraid of sending consumers back physically, and only 35% of our MW consumers were able to perform virtual learning. Our losses far surpassed our PPP.
