4. Project/Program Description

SW 52nd Street is a low-lying road within the western limits of Dania Beach, consisting primarily of single-family homes that flood because there is no stormwater infrastructure. A study was conducted to recommend stormwater improvements to alleviate flooding. Phase I improvements are currently being constructed along SW 43 Terrace that discharge stormwater to a nearby lake. The SW 52nd Street project is the next phase to build infrastructure along SW 52nd Street, connecting to Phase I improvements.

Improvements include the installation of drainage pipes and inlets and regrading swales along 2,000 linear feet of SW 52nd Street, from S.R. 7 east to SW 40th Avenue. The project is 100% designed and has all the required permits. The cost estimate for this project is \$1,000,000. Therefore, the City requests \$500,000 in funding and will provide a \$500,000 cash match for the project.
