## The Florida Senate Local Funding Initiative Request Fiscal Year 2023-2024

LFIR # 2840

The funds will be used to design Sunbridge Parkway, which will facilitate the creation of 44,130 area jobs for Central Florida residents, as well as provide mobility relief to the heavily congested Narcoossee Road corridor just to the west of the project area. The housing mix in Sunbridge will provide new affordable options for citizens to access, as well as recreational opportunities in about 13,000 acres of open space, trails and parks.

### b. What activities and services will be provided to meet the intended purpose of these funds?

A Project Development and Environment study, funded exclusively by Osceola County, will determine a potential alignment for Sunbridge Parkway and evaluate the social, cultural and financial impacts of the new roadway. That effort, which is currently underway, is expected to last about 18 months. Design of the project will follow, resulting in construction of the new roadway.

c. What direct services will be provided to citizens by the appropriation project?

Direct services include the design, and ultimately construction, of a new and improved transportation network to access jobs, housing and recreational opportunities in the area.

d. Who is the target population served by this project? How many individuals are expected to be served?

The target population is residents and visitors in northeast Osceola County, which ultimately could serve the transportation needs of more than 60,000-plus residents in Sunbridge, an estimated 44,130 new workers, as well as existing residents who live along the existing Narcoossee Road corridor.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

The expected benefit is an expanded transportation network in congested northeast Osceola County, as well as providing access to new jobs, and recreational and job opportunities in Sunbridge. Osceola County will continue to monitor the progress of connections within the Sunbridge community that ultimately will connect to the County's project to the south, and provide direct access to SR 528 to the north in Orange County.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for the contract?

Should the County default and fail to provide the state final design plans for this project within 5 years of the funding award, Osceola County agrees to reimburse the state for the entirety of the grant award.
