Spending Category	Description	Amount
Administrative Costs:		
Executive Director/Project Head Salary and Benefits	Project lead at the Florida Water Institute to manage the project.	30,000
Other Salary and Benefits	Other salary and benefits for 6-8 UF faculty members and staff from various disciplines within the University to perform the independent science and economics assessment.	270,000
Expense/Equipment/Travel/Supplies/Other		0
Consultants/Contracted Services/Study	Development of planning level cost estimates for restoration of the Ocklawaha River as set forth in the pending Environmental Resource Permit, prepared by FDEP for action by SJRWMD.	200,000
Operational Costs: Other		
Salary and Benefits		0
Expense/Equipment/Travel/Supplies/ Other		0
Consultants/Contracted Services/Study		0
Fixed Capital Construction/Majo	r Renovation:	
Construction/Renovation/Land/ Planning Engineering		0
Total State Funds Requested (m	ust equal total from question #6)	500,000

14. Program Performance

a. What specific purpose or goal will be achieved by the funds requested?

b. Organization

The Florida Senate Local Funding Initiative Request Fiscal Year 2024-2025

LFIR # 3645

Provide an updated, independent assessment of Ocklawaha River restoration vs. retention of the Kirkpatrick Dam and Rodman Reservoir that includes the following: 1) Compilation and assessment of all relevant existing science and economic data and reports from federal, state, and regional agencies, universities and other sources. 2) Prepares updated planning level cost projections for Ocklawaha River restoration as described in pending FDEP permit. 3) Provides updated information to allow state leaders to make an informed decision on the future of the Kirkpatrick Dam and Rodman Reservoir based on updated and best available science, economics and costs.

b. What activities and services will be provided to meet the intended purpose of these funds?

- 1) Assessment of water and natural resources including impacts to the Ocklawaha and St. Johns Rivers and Silver Springs under restoration vs. retention of Kirkpatrick Dam and Rodman Reservoir. This includes topics such as water quality, downstream flow, water quality, springs restoration, fish and manatee habitat, wildlife impacts and other relevant areas.
- Assessment of impacts to people and property upstream and downstream of the Kirkpatrick Dam and Rodman Reservoir
- 3) Assessment of impacts to economic activity including tourism, job creation, economic development, and economic selfsufficiency
- 4) Reduction of economic risks and taxpayer costs including repair and maintenance, loss of people and property, devaluation of property due to environmental conditions, opportunity costs such as the loss of existing state and federal funding

c. What direct services will be provided to citizens by the appropriation project?

The independent science and economic report will provide state leaders and their constituents with the information necessary to make an informed decision on the future of the dam and understand how that decision could impact effected individuals and communities.

d. Who is the target population served by this project? How many individuals are expected to be served?

The 217-mile river system impacted by this decision extends from the headwaters of the Ocklawaha at Lake Apopka to the Atlantic Ocean at Jacksonville. This project would serve communities of the Ocklawaha Harris Chain of Lakes, Silver Springs, Ocklawaha River and St. Johns River including Welaka and Palatka and northward along the 100 mile St. Johns River Estuary including Green Cove Springs and Jacksonville. The restoration impacts at least 12 counties with rivers, tributaries and drainage basins connected to this system. State, national and international visitors use this system on a regular basis.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

The project will provide state leaders a decision support tool to help them make an informed decision and achieve the best economic and conservation outcomes on the future of the dam in 2025 and, if restoration is pursued, leverage millions in federal funds in areas such as fish passage and recreation improvements. Using best available reports, UFWI may include data on return on investment, visitation and tourism, job and business creation, economic risks, and outdoor recreation. Existing data and analysis related to conservation may include but is not limited to system-wide fish and wildlife habitat, water quality, water flow, springs and river system health, wildlife corridor, wetlands, aquatic weed management and fishery changes.

Measures: FDEP, FWC and SJRWMD data; Tourism data, Office of Economic Opportunity, Florida Dept. of Business and Professional Regulation

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for the contract?

Failure to meet de	Failure to meet deliverables will result in repayment of the funds.
