The Florida Senate **Local Funding Initiative Request Fiscal Year 2025-2026**

LFIR # 1132

13. Program Performance

a. What specific purpose or goal will be achieved by the funds requested?

The goal is to expand our breast and cervical screening and cancer program to increase access to early detection screenings for breast and cervical cancer which not only saves lives but saves the community resources. Survival rates if caught in the early states are nearly 99% for breast cancer and 95% for cervical cancer. The Promise Fund is replicating its Women's Health Program to 2 more locations in 2025 which will increase demand for program services.

b. What activities and services will be provided to meet the intended purpose of these funds?

Patient Navigators will guide participants through the health system, facilitate scheduling appointments and making appropriate referrals, ensure participants with abnormal findings receive all follow-up care and treatment, facilitate interaction and communication with health care staff and providers, provide outreach/education and ensure barriers to care are overcome (e.g. transportation, language, financial).

c. What direct services will be provided to citizens by the appropriation project?

Patient Navigators will provide multi-lingual patient navigation to low-income women residing in Palm Beach County in need of mammograms, pap tests and HPV Vaccinations to increase access to care and ensure all participants are connected to primary care providers. Social determinants of health will be reviewed, and appropriate referrals will be made to target needs.

d. Who is the target population served by this project? How many individuals are expected to be served?

Persons with poor physical health and economically disadvantaged persons. We intend to reach more than 4,500

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

The expected benefits are to improve physical health, improve mental health, improve quality education, and improve health access. We will measure and track the following: connection to a medical home, ensuring women receive appropriate detection screening referrals and cancer treatment resources, connection to a mental health professional with a positive cancer diagnosis, participation in a patient satisfaction survey, number of individuals reached through community outreach and education, how many participants sign up for Patient Navigation, maintain client demographic data reports, surveys and participant interviews.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for in the contract?

	nprovement plan with outcomes bound by timelines and a formal review.
4. Is	this project related to mitigation, response, or recovery from a natural disaster? No
a. If	Yes, what phase best describes the project?
	Mitigation (reducing or eliminating potential loss of life or property)
	Response (addressing the immediate and short-term effects of a natural disaster)
	Recovery (assisting communities return to normal operations, including rebuilding damaged infastructure)
b. N	lame of the natural disaster (or Executive Order # for events not under a federal declaration):
5. Ha	s the entity applied for or received federal assistance for this project?
