d. Who is the target population served by this project? How many individuals are expected to be served?

The program will serve individuals who are victims of human trafficking who have reached stabilization (i.e. are no longer under the human trafficker's control). We anticipate serving 30 individuals in Year 1.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

Goodwill's previous capacity building and operations in this sector have substantiated that life skills and career development are critical for the successful transition of victims of human trafficking. Victims receive intensive assessments and life coaching and career development, emphasizing up skilling and re-skilling. Goodwill will supplement these services with substance abuse, mental health counseling, and parenting with family reunification. All services are offered using motivational interviewing and active listening techniques, and by applying a variety of modalities through a trauma-informed, victim-centered, and survivor-informed lens. Goodwill will analyze strategies and track outcomes of the program, both at the participant and systemic level. Participant demographic, process and outcome data will be tracked to evaluate the program's effectiveness, efficiency, accessibility, the satisfaction of key stakeholders, and the impact of services.
