Complete questions 10 and 11 for Fixed Capital Outlay Projects

| 10. Status of Const | truction | | | |
|---------------------|--------------------|---|-------------------------------|------|
| a. What is the cu | urrent phase of t | he project? | | |
| Planning | O Design | | | |
| b. Is the project | "shovel ready" (| (i.e permitted)? | Yes | |
| c. What is the es | stimated start da | te of construction? | 11/11/2024 | |
| d. What is the es | stimated comple | tion date of construction? | 08/01/2026 | |
| e. What funding | stream will be u | sed for ongoing operations | and maintenance of the proj | ect? |
| [Over 1.25M rais | sed during the las | ille operations and Baptist Heat t 12-months for the expansion tase three completion projecte | itself.] Phase two completion | |

11. List the owners of the facility to receive, directly or indirectly, any fixed capital outlay funding. Include the relationship between the owners of the facility and the entity.

Baptist Medical Center Jacksonville [Southern Baptist Hospital of Florida]. Jacksonville headquartered, locally governed, faith-based, mission driven, 501c3 not for profit health system.

12. Details on how the requested state funds will be expended

| Spending Category | Description | Amount |
|---|---|-----------|
| Administrative Costs: | | |
| Executive Director/Project Head Salary and Benefits | | 0 |
| Other Salary and Benefits | | 0 |
| Expense/Equipment/Travel/Supplies/ Other | | 0 |
| Consultants/Contracted Services/Study | | 0 |
| Operational Costs | | |
| Salary and Benefits | | 0 |
| Expense/Equipment/Travel/Supplies/ Other | | 0 |
| Consultants/Contracted Services/Study | | 0 |
| Fixed Capital Construction/Majo | r Renovation: | |
| Construction/Renovation/Land/ Planning Engineering | Direct costs of work: Existing conditions, concrete, metals, thermal and moisture protection, openings, equipment, fire suppression, plumbing, heating, ventilating, air conditioning, electrical, communications, contracting requirements, etc. E.g., Structural steel reinforcement, mechanical steel frames on roof, exterior and interior expansion joint repair, etc. | 4,535,475 |
| Total State Funds Requested (m | ust equal total from question #6) | 4,535,475 |

13. Program Performance

a. What specific purpose or goal will be achieved by the funds requested?

LFIR # 1383

Rising Demand: High-risk pregnancies in NEFL are projected to increase by 14.5% over the next decade, due to rapid population growth and advanced maternal age. Recent closures in Jax have compounded the issue. The requested funds will support the expansion of high-risk obstetric (OB) services at Baptist Medical Center Jacksonville. The primary goal is to increase access to specialized care for high-risk pregnancies by expanding labor and delivery capacity, establishing a dedicated antepartum unit, and enhancing OB emergency and triage services.

b. What activities and services will be provided to meet the intended purpose of these funds?

Expanded Labor and Delivery services for high-risk perinatal care, a dedicated antepartum unit, 8-bed triage/emergency room, offering 24/7 emergency care for pregnant women with urgent complications. Critical NICU Link: By connecting to Wolfson Children's Hospital's 87-bed neonatal intensive care unit [regions only Level IV NICU], we can better address prematurity. 34% of infant deaths are attributed to prematurity [delivery before 37 weeks].

c. What direct services will be provided to citizens by the appropriation project?

High risk maternal care and the most acute neonatal care with the region's only Level IV neonatal intensive care unit [NICU] at Wolfson Children's Hospital. Twelve additional labor and delivery rooms designed to accommodate mothers with high-risk pregnancies. This unit is in close proximity to the operating room, if needed, and has a dedicated OB/GYN available 24/7.

d. Who is the target population served by this project? How many individuals are expected to be served?

High-risk pregnant women in Northeast Florida, particularly those with medical complications, advanced maternal age, poor physical health, or multiple gestations. Newborns requiring specialized neonatal care, particularly preterm infants or those with congenital anomalies. Underserved and at-risk populations in Duval County, where infant and maternal mortality rates exceed state averages. Women affected by recent hospital closures, which have reduced access to OB care in the region. | Greater than 800.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

Quantitative increase in high-risk OB L&D access in northeast Florida next to region's only Level IV NICU. Fetal anomalies occur in 4.5 percent of all pregnancies. (Increased risk with advanced maternal age and fertility treatment.) Preterm birth rate is now 10.2% of all pregnancies. Note: 34% of infant deaths were attributed to prematurity (delivery before 37 weeks). Fetal growth restriction occurs in 10% of pregnancies (3% severe). Multiple gestation is now 4.3% climbing. Infant mortality in NEFL is 6.3 per 1,000 births (7.9 in Duval). Neonatal mortality, infant mortality, post neonatal mortality, and maternal mortality rates in Duval County are all higher than the rate of the State of Florida.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for in the contract?

| 4. Is | this project related to mitigation, response, or recovery from a natural disaster? No |
|-------|--|
| a. If | Yes, what phase best describes the project? |
| | Mitigation (reducing or eliminating potential loss of life or property) |
| | Response (addressing the immediate and short-term effects of a natural disaster) |
| | Recovery (assisting communities return to normal operations, including rebuilding damaged infastructure) |
| b. N | lame of the natural disaster (or Executive Order # for events not under a federal declaration): |
