Construction/Renovation/Land/ Planning Engineering		0
Total State Funds Requested (m	ust equal total from question #6)	636,241

13. Program Performance

a. What specific purpose or goal will be achieved by the funds requested?

LFIR # 1466

The purpose of this proposed project is to expand the program's capacity to serve more students and demonstrate a greater impact by contributing to a stronger workforce pipeline that will benefit the broader state economy going forward. The overall purpose of the Destination Graduation program is threefold: 1) Ensure that every student has the same opportunity to graduate and attain a high- quality degree or industry certification; 2) Increase the graduation rates of lowincome, first-generation and veteran students; 3) Improve the financial literacy/financial stability skills of students at risk of dropping out of college.

b. What activities and services will be provided to meet the intended purpose of these funds?

Expand the program's reach to serve additional students, providing more comprehensive support and resources to help them succeed academically.

Provide Financial Education Programming: Implement financial literacy workshops and resources for students utilizing the program, empowering them with the knowledge to manage their finances and reduce economic stress.

Create a Student Ambassador Stipend Program: Establish a program to compensate student ambassadors who will assist with program outreach, peer mentoring, and community engagement.

Direct Assistance: Provide financial support for eligible students in need, ensuring they can stay enrolled and focused on their studies.

c. What direct services will be provided to citizens by the appropriation project?

Navigation services will direct students to internal Seminole State resources (e.g. – financial aid, academic services, technology resources, etc.)

Students will be connected with external community resources (e.g. – food pantries, childcare referrals, transportation services, and more).

Students will be assessed and provided case management services to support the students' unique needs (e.g. financial assistance, financial education/budgeting, connections to health/mental health services).

d. Who is the target population served by this project? How many individuals are expected to be served?

Low-income, first-generation and/or military veteran college students who are at risk of dropping out of classes due to financial issues that may prevent them from continuing their education to graduate with their cohort. The projected number of individuals to be served during the project year is a minimum of 400, an increase of 50 percent.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

Increase Capacity to Serve More Students: Measured by program records, and college registration reports, compared to FY 2024.

Outcome 1: Increase program enrollment by 25% within the next 12 months.

Outcome 2: Increase rate of students remaining in classes within the next 12 months by 10%.

Financial Education Programming: Measured by log-in records and pre- / post- surveys.

Outcome 1: Conduct 12 financial literacy workshops annually, with at least 80% of participants reporting increased knowledge of personal finance topics (budgeting, credit management, student loan repayment).

Create a Student Ambassador Program: Measured by pre- and post- surveys and participation records.

Outcome 1: Recruit and train 10 student ambassadors within first year to assist with outreach, peer mentoring, community engagement.

Outcome 2: Achieve a 15% increase in program activity through ambassador-led activities.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for in the contract?

Heart of Florida United Way will create and implement an action plan describing the steps we will take that will ensure HFUW meets deliverables and performance measures.

- 14. Is this project related to mitigation, response, or recovery from a natural disaster? No
 - a. If Yes, what phase best describes the project?
