Local Funding Initiative Request

Fiscal Year 2025-2026

LFIR # 1493

1. Project Title

2. Senate Sponsor

3. Date of Request

4. Project/Program Description

Purchase and deploy mobile, vehicle threat mitigation, barriers at numerous pedestrian based events to establish a hard line defense from vehicular attacks and incidents. This project would provide resources necessary for enhanced public safety through deterring and reducing the capability of using a vehicle as a means for a mass casualty attack. The City of Winter Park hosts a large number of publicly held events each year, where over one hundred thousand people attend. The barriers would be a regional asset, available for use by other law enforcement agencies, upon request, for similar public events.

The trailers, barriers and accessories will be stored at the Winter Park Public safety complex and deployed according to operational plans at events. The deployment of barriers will allow for roadways and walkways to be safely protected against vehicle threats and incidents.

c. What direct services will be provided to citizens by the appropriation project?

The citizens will have enhanced safety while attending public events. The enhanced safety is provided by blocking vehicle access, on roadways and walkways, to public gatherings. The barrier systems are specifically designed for this purpose and tested to ensure proper function against vehicle incidents. The barrier systems will also help achieve an overall sense of calm and safety at public events by those in attendance.

d. Who is the target population served by this project? How many individuals are expected to be served?

The City of Winter Park host approximately seventy five (75) events each calendar year. The attendance for all of the events combined is estimated at over one hundred thousand people (100,000). In addition to events with the City limits of Winter Park the barrier systems would be a regional asset and available for use by other law enforcement agencies within Central Florida.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

The expected benefit and outcome for this project is to provide a safe environment for public events where the risk of vehicular attacks or incidents are significantly reduced due to the requested equipment. The outcomes for the success of the project will be measured by the public sense of safety at events as well as the absence of any incidents or the effective prevention of an attempted incident.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for in the contract?

Failing to meet deliverables for this project could be penalized by the reimbursement of the cost of the equipment.

14. Is this project related to mitigation, response, or recovery from a natural disaster?

a. If Yes, what phase best describes the project?
