<b>Total State Funds Requested (m</b>	ust equal total from question #6)	2,000,000

#### 13. Program Performance

a. What specific purpose or goal will be achieved by the funds requested?

**LFIR # 1667** 

When flow from the collection system reaches the WRF, the pipes manifold in such a way that the flow competes for the limited space available to enter the first unit process called the headworks. The City is proposing the flow enter the equalization tank prior to entering the headworks, allowing for a more balanced, controlled flow and providing 2MG of storage. The balancing and storage is important in severe weather events to prevent raw sewage spills on the ground, allow improved control over the rapidly fluctuating inflow from the collection system, and providing uniformity in flow to improve the treatment process (no shock loading).

b. What activities and services will be provided to meet the intended purpose of these funds?

With the severe weather experienced in the City in calendar year 2024, in excess of 150,000,000 gallons of partially treated or untreated flow, was bypassed through the plant or overflowed in the collection system and entered the ecosystem of the Manatee River. The EQ tank takes on the challenge of improving the flow conditions into the plant to help prevent spills and overburdening of the downstream processes, allowing fully treated water to be discharged, instead of unauthorized discharges and SSO's.

c. What direct services will be provided to citizens by the appropriation project?

The direct service or impact to all citizens in the County is improved water quality in the Manatee River. Fully treated effluent reduces the nutrient load to the river, i.e. nitrogen and phosphorus, which creates an environment conducive to algae growth; and with complete filtration, reduces the suspended sediments in the effluent that can negatively impact the sea grass and fish communities in the river. Improved water quality makes economic sense for the local residents, businesses, and the tourists we welcome every year.

d. Who is the target population served by this project? How many individuals are expected to be served?

The entire county population (+/-400K) is impacted by the water quality in the Manatee River. The effluent discharge from the WRF goes directly to the Manatee River. When partially treated discharge reaches the river, swimming and fishing prohibitions are immediately posted. As a tourist driven market, disruption to the river creates havoc for eco-sports in the county, impacting paychecks for the locals, vacation time and spending for the tourists, and income to the business community.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

The expected benefit is improved water quality in the Manatee River and fewer unauthorized discharges and SSO events. The City is required to report unauthorized discharges and SSO to FDEP, a reduction in volume and number of events reported is the measure of improvement as well as the sampling in the river to show reduce nitrogen and phosphorus levels in the effluent.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for in the contract?

Ν	lo suggestions at this time.
14. Is	this project related to mitigation, response, or recovery from a natural disaster? Yes
a. If	Yes, what phase best describes the project?
	Mitigation (reducing or eliminating potential loss of life or property)
$\square$	Response (addressing the immediate and short-term effects of a natural disaster)
	Recovery (assisting communities return to normal operations, including rebuilding damaged infastructure)
b. N	lame of the natural disaster (or Executive Order # for events not under a federal declaration):
ld	alia, Debby, Helene, Milton
15. Ha	s the entity applied for or received federal assistance for this project?
	Yes, Applied

**LFIR # 1667** 

	□ Yes, Received
	☑ No
	□ No, but intends to apply
á	a. If yes, provide the FEMA project worksheet ID#:
I	p. Provide the total project cost listed on the FEMA project worksheet:
16.	Has the entity applied for or received state assistance for this project (other than this request)?
	☐ Yes, Applied
	☐ Yes, Received
	☑ No
	□ No, but intends to apply
	a. If yes, specify the program and state agency (ex. Local Government Emergency Bridge Loan, Department of Commerce):
Ple	ease complete questions 17 through 21 for Water Projects only.
17.	Have you been awarded or applied for alternative state funding for this project?
	□ Water Quality Improvement Grant Program
	□ Resilient Florida Grant Program
	□ Wastewater Revolving Loan
	☐ Drinking Water Revolving Loan
	□ Small Community Wastewater Treatment Grant
	☐ Other (please specify, ex. Alternative Water Supply Grants)
	☑ N/A
18.	What is the population economic status?
	☐ Financially Disadvantaged Community (ch. 62-552, F.A.C)
	☐ Financially Disadvantaged Municipality (ch. 62-552, F.A.C)
	□ Rural Area of Economic Concern
