13. Program Performance

a. What specific purpose or goal will be achieved by the funds requested?

□ No

The Florida Senate Local Funding Initiative Request Fiscal Year 2025-2026

LFIR # 1671

To advance knowledge, providing early diagnosis, delivering comprehensive clinical care, and offering education and support for children with rare genetic conditions and their families. The institute strives to make a lasting positive impact on the lives of these children and their families while contributing to research and public health in the field of pediatric rare diseases.

b. What activities and services will be provided to meet the intended purpose of these funds?

Collaborate with experts in genetics, pediatrics, and public health to design a comprehensive newborn screening. Establish state-of-the-art CLIA certified genetic testing laboratories equipped for high-throughput genetic screening equipment which will be provided by FSU valued at \$1.5m.

c. What direct services will be provided to citizens by the appropriation project?

Collaborate with experts in genetics, pediatrics, and public health to design a comprehensive newborn screening. Establish state-of-the-art CLIA certified genetic testing laboratories equipped for high-throughput genetic screening equipment which will be provided by FSU valued at \$1.5m.

d. Who is the target population served by this project? How many individuals are expected to be served?

The primary target population for the FSU Institute for Pediatric Rare Diseases is children who are affected by rare diseases. The institute aims to develop innovative approaches for the diagnosis and treatment of these rare diseases, with a focus on early detection through newborn screening. Additionally, the institute's vision includes community engagement and outreach, suggesting a broader interest in raising awareness and providing resources for families and communities affected by pediatric rare diseases in Florida.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

The project will contribute valuable data for research, advancing our understanding of rare diseases and potentially leading to new treatment options. Also, it will establish state-of-the-art Clinical Laboratory Improvement Amendments (CLIA) certified genetic testing laboratory equipped for high-throughput genetic screening. Labs that are CLIA certified meet the federal regulations and standards for facilities that test human specimens for health assessment or to diagnose, prevent, or treat disease.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for in the contract?

	Re	vert state appropriation and withhold future funding for this initiative.			
14.	ls th	nis project related to mitigation, response, or recovery from a natural disaster? No			
á	a. If `	Yes, what phase best describes the project?			
		Mitigation (reducing or eliminating potential loss of life or property)			
		Response (addressing the immediate and short-term effects of a natural disaster)			
		Recovery (assisting communities return to normal operations, including rebuilding damaged infastructure)			
k	b. Name of the natural disaster (or Executive Order # for events not under a federal declaration):				
15.	Has	the entity applied for or received federal assistance for this project?			
	ΠY	es, Applied			
	□ Y	es, Received
