New homes would be able to connect to the centralized sanitary sewer. By connecting new homes to the sanitary sewer this would prevent them from having septic tanks that can impair the Rainbow Springs spring shed. Thus preventing total nitrogen that is produced due to On-site Sewage Treatment Disposal Systems (OSTDS) from impacting the Upper Floridan Aquifer.

**d. Who is the target population served by this project? How many individuals are expected to be served?**

Roughly 2,250 homes in the West Oak development and homes located around lift station 3, 85, and 146 area.

**e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?**

By connecting approximately 2,250 new homes, this prevents them from installing septic tanks. This prevents approximately 32,265 lbs of TN from ever contaminating the groundwater annually. Based on data that the loadings in pounds of nitrogen per OSTDS in Rainbow Springs spring sheds is approximately 9.92 lb-N/person, and the household average in Marion County is 2.41 persons.

**f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for in the contract?**

Standard penalties, bonding requirements, and state/federal license requirements.

**14. Is this project related to mitigation, response, or recovery from a natural disaster?**  No

**a. If Yes, what phase best describes the project?**

- Mitigation (reducing or eliminating potential loss of life or property)
- Response (addressing the immediate and short-term effects of a natural disaster)
- Recovery (assisting communities return to normal operations, including rebuilding damaged infrastructure)

**b. Name of the natural disaster (or Executive Order # for events not under a federal declaration):**

**15. Has the entity applied for or received federal assistance for this project?**
