d. Who is the target population served by this project? How many individuals are expected to be served?

residents of winter springs.

e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?

This project will enhance the reliability of the potable water system along Winter Springs Blvd by installing isolation mains, preventing widespread service disruptions when a section of the main is compromised. The expected outcome is improved water system resilience, reduced impact on residents, and more efficient maintenance and repairs. Success will be measured by tracking the reduction in service disruptions, the number of affected customers, improvements in repair response times, and stability in water pressure and flow.

f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for in the contract?

Additional actions could include requiring corrective action plans, increasing oversight, or modifying contract terms.
