## Local Funding Initiative Request

### Fiscal Year 2025-2026

LFIR # 2507

1. Project Title

2. Senate Sponsor

3. Date of Request

4. Project/Program Description

This 500 acre neighborhood area, has experienced high levels of flooding through the years. Most of the stormwater infrastructure in this area was installed prior to 1970, under capacity in both pipe size and inlet capability. Localized flooding from rainfall events coupled with tidal influence on this area results in roadway flooding, and some instances repetitive flooding of structures. The City's recently adopted Stormwater Master Plan has identified this area as a top priority for study and improvement. This project proposes a flood study with hydraulic analysis to confirm level of service of existing infrastructures and identify future needs. Results from this analysis will allow for the identification of undersized and aging drainage infrastructure in this area and prepare the city to install right-sized infrastructure to reduce chronic flooding.
