Two things, increased potable water service to residents, but potable water transmission will improve the overall water and wastewater system within the city.

**d. Who is the target population served by this project? How many individuals are expected to be served?**

citizens of winter springs and all those in the lake jessup BMAP

**e. What is the expected benefit or outcome of this project? What is the methodology by which this outcome will be measured?**

This project will expand the reclaimed water supply to the City, reducing the reliance on potable water for irrigation. By providing an estimated 24,635 gallons per day to reclaimed water users, the project will help conserve potable water resources and promote sustainable water management. The expected outcome is a more efficient and environmentally responsible water system, with success measured by the volume of reclaimed water distributed, the reduction in potable water usage, and overall system performance improvements.

**f. What are the suggested penalties that the contracting agency may consider in addition to its standard penalties for failing to meet deliverables or performance measures provided for in the contract?**

Additional actions could include requiring corrective action plans, increasing oversight, or modifying contract terms.

**14. Is this project related to mitigation, response, or recovery from a natural disaster?**  No

**a. If Yes, what phase best describes the project?**

- Mitigation (reducing or eliminating potential loss of life or property)
- Response (addressing the immediate and short-term effects of a natural disaster)
- Recovery (assisting communities return to normal operations, including rebuilding damaged infrastructure)

**b. Name of the natural disaster (or Executive Order # for events not under a federal declaration):**
