10

WHEREAS, at birth, a child has one hundred billion brain cells that will be developed by the experiences of life, and

11

12

13

WHEREAS, the stimulation that causes brain development can be positive, such as conversation, music, and parental love, or it can be negative, such as neglect or emotional and physical abuse, and

14

15

16

17

WHEREAS, during the first year of a child's life the connections between the cells, the synapses, increase twenty-fold, making the first year a crucial time for brain development, and

18

19

20

WHEREAS, infants develop synapses when they listen to language and music, see colors and shapes, and feel and handle objects of different sizes, shapes, and textures, and

21

22

23

WHEREAS, there is no other time in a child's life as productive for brain development as the first year, NOW

24

25

THEREFORE,

26

27

Be It Enacted by the Legislature of the State of Florida:

28

29

30

Section 1. Each state-funded education and care program for children from birth to 5 years of age must provide

31

1 activities to foster brain development in infants and
2 toddlers. A program must provide an environment rich in
3 language and music and filled with objects of various colors,
4 shapes, textures, and sizes to stimulate visual, tactile,
5 auditory, and linguistic senses in the children and must
6 include classical music and at least 30 minutes of reading to
7 the children each day. A program may be offered through an
8 existing early childhood program such as Healthy Start, the
9 Title I program, contracted or directly operated subsidized
10 child care, the prekindergarten early-intervention program,
11 Florida First Start, the Head Start program, or a private
12 childcare program. A program must provide training for the
13 infants' and toddlers' parents including direct dialogue and
14 interaction between teachers and parents demonstrating the
15 urgency of brain development in the first year of a child's
16 life. Family daycare centers are encouraged, but not required,
17 to comply with this section.

18 Section 2. The Executive Office of the Governor shall
19 contract for an evaluation of programs to stimulate brain
20 development in infants and toddlers and shall report the
21 results of the evaluation to the President of the Senate and
22 the Speaker of the House of Representatives by January 1,
23 2000.

24 Section 3. This act shall take effect upon becoming a
25 law.
