Florida Senate - 1999

By Senator King

8-1855-99 A bill to be entitled 1 2 An act relating to onsite sewage treatment and 3 disposal systems; amending s. 381.0065, F.S.; 4 providing for regulation of maintenance 5 entities for performance-based treatment 6 systems and aerobic treatment unit systems; 7 amending s. 381.0066, F.S.; reducing annual operating permit fee for aerobic treatment 8 9 units or performance-based treatment systems; 10 providing an effective date. 11 12 Be It Enacted by the Legislature of the State of Florida: 13 Section 1. Paragraph (n) is added to subsection (3) of 14 section 381.0065, Florida Statutes, 1998 Supplement, paragraph 15 16 (i) of subsection (4) of that section is amended, and 17 paragraph (t) is added to subsection (4) of that section, to read: 18 19 381.0065 Onsite sewage treatment and disposal systems; 20 regulation. --(3) DUTIES AND POWERS OF THE DEPARTMENT OF 21 22 HEALTH.--The department shall: 23 (n) Regulate and permit maintenance entities for 24 performance-based treatment systems and aerobic treatment unit 25 systems. To ensure that systems are maintained and operated according to manufacturer's specifications and designs, the 26 27 department shall establish by rule minimum qualifying criteria 28 for maintenance entities. The criteria shall include: 29 training; access to approved spare parts and components; 30 access to manufacturer's maintenance and operation manuals; and service response time. The maintenance entity shall employ 31 1

1 a contractor licensed under s. 489.105(1)(m) or under part III of chapter 489, or a state-licensed wastewater plant operator, 2 3 who is responsible for maintenance and repair of all systems under contract. The maintenance entity shall file a surety 4 5 bond with the department in an amount equal to the cost of б annual permitting for all systems under maintenance contract. 7 The bond shall be executed by the maintenance entity as 8 principal and a surety company authorized and licensed to do business in the state as surety. The bond shall be contingent 9 10 upon the faithful compliance of the maintenance entity with 11 this section or rules adopted under this section and shall run to the department for benefit of any system owner who suffers 12 a financial loss as a result of the misuse or misappropriation 13 by the maintenance entity of funds collected pursuant to this 14 section and s. 381.0066. Any surety company that cancels or 15 does not renew the bond of any licensee shall notify the 16 17 department in writing not less than 30 days in advance of such action, giving the reason for the cancellation or nonrenewal. 18 19 (4) PERMITS; INSTALLATION; AND CONDITIONS.--A person may not construct, repair, modify, abandon, or operate an 20 21 onsite sewage treatment and disposal system without first obtaining a permit approved by the department. The department 22 may issue permits to carry out this section. A construction 23 24 permit is valid for 18 months from the issuance date and may be extended by the department for one 90-day period under 25 rules adopted by the department. A repair permit is valid for 26 27 90 days from the date of issuance. An operating permit must be 28 obtained prior to the use of any aerobic treatment unit or if 29 the establishment generates commercial waste. Buildings or 30 establishments that use an aerobic treatment unit or generate 31 commercial waste shall be inspected by the department at least

2

Florida Senate - 1999 8-1855-99

1 annually to assure compliance with the terms of the operating 2 permit. The operating permit is valid for 1 year from the date 3 of issuance and must be renewed annually. If all information 4 pertaining to the siting, location, and installation 5 conditions or repair of an onsite sewage treatment and б disposal system remains the same, a construction or repair 7 permit for the onsite sewage treatment and disposal system may 8 be transferred to another person, if the transferee files, 9 within 60 days after the transfer of ownership, an amended 10 application providing all corrected information and proof of 11 ownership of the property. There is no fee associated with the processing of this supplemental information. A person may 12 not contract to construct, modify, alter, repair, service, 13 abandon, or maintain any portion of an onsite sewage treatment 14 and disposal system without being registered under part III of 15 chapter 489. A property owner who personally performs 16 17 construction, maintenance, or repairs to a system serving his or her own owner-occupied single-family residence is exempt 18 19 from registration requirements for performing such construction, maintenance, or repairs on that residence, but 20 21 is subject to all permitting requirements. A municipality or political subdivision of the state may not issue a building or 22 plumbing permit for any building that requires the use of an 23 24 onsite sewage treatment and disposal system unless the owner or builder has received a construction permit for such system 25 from the department. A building or structure may not be 26 occupied and a municipality, political subdivision, or any 27 28 state or federal agency may not authorize occupancy until the 29 department approves the final installation of the onsite sewage treatment and disposal system. A municipality or 30 31 political subdivision of the state may not approve any change

3

in occupancy or tenancy of a building that uses an onsite
sewage treatment and disposal system until the department has
reviewed the use of the system with the proposed change,
approved the change, and amended the operating permit.

5 (i) An onsite sewage treatment and disposal system for 6 a single-family residence that is designed by a professional 7 engineer registered in the state and certified by such 8 engineer as complying with performance criteria adopted by the 9 department must be approved by the department subject to the 10 following:

11 1. The performance criteria applicable to engineer-designed systems must be limited to those necessary 12 to ensure that such systems do not adversely affect the public 13 health or significantly degrade the groundwater or surface 14 water. Such performance criteria shall include consideration 15 of the quality of system effluent, the proposed total sewage 16 17 flow per acre, wastewater treatment capabilities of the natural or replaced soil, water quality classification of the 18 19 potential surface-water-receiving body, and the structural and 20 maintenance viability of the system for the treatment of domestic wastewater. However, performance criteria shall 21 address only the performance of a system and not a system's 22 design. 23

24 2. The technical review and advisory panel shall 25 assist the department in the development of performance 26 criteria applicable to engineer-designed systems. Workshops 27 on the development of the rules delineating such criteria 28 shall commence not later than September 1, 1996, and the 29 department shall advertise such rules for public hearing no 30 later than October 1, 1997.

Florida Senate - 1999 8-1855-99

1 3. A person electing to utilize an engineer-designed 2 system shall, upon completion of the system design, submit 3 such design, certified by a registered professional engineer, to the county health department. The county health department 4 5 may utilize an outside consultant to review the б engineer-designed system, with the actual cost of such review 7 to be borne by the applicant. Within 5 working days after 8 receiving an engineer-designed system permit application, the 9 county health department shall request additional information 10 if the application is not complete. Within 15 working days 11 after receiving a complete application for an engineer-designed system, the county health department either 12 shall issue the permit or, if it determines that the system 13 does not comply with the performance criteria, shall notify 14 the applicant of that determination and refer the application 15 to the department for a determination as to whether the system 16 17 should be approved, disapproved, or approved with modification. The department engineer's determination shall 18 19 prevail over the action of the county health department. The 20 applicant shall be notified in writing of the department's 21 determination and of the applicant's rights to pursue a variance or seek review under the provisions of chapter 120. 22 The owner of an engineer-designed performance-based 23 4. 24 system must maintain a current maintenance service agreement 25 with a maintenance entity permitted by the department. The maintenance entity shall obtain an annual system operating 26 27 permit from the department for each system under service 28 The department shall inspect the system at least contract. 29 annually, or on such periodic basis as the fee collected 30 permits, and may collect system-effluent samples if 31 appropriate to determine compliance with the performance 5

criteria. The fee for the annual operating permit shall be collected beginning with the second year of system operation. The maintenance entity shall inspect each system at least twice each year and shall report quarterly to the department on the number of systems inspected and serviced. If an engineer-designed system fails to properly function or fails to meet performance standards, the system shall be re-engineered, if necessary, to bring the system into compliance with the provisions of this section. (t) The owner of an aerobic treatment unit system shall maintain a current maintenance service agreement with an

aerobic treatment unit maintenance entity permitted by the 12 department. The maintenance entity shall obtain an annual 13 system operating permit from the department for each aerobic 14 treatment unit under service contract. The maintenance entity 15 shall inspect each aerobic treatment unit system at least 16 twice each year and shall report quarterly to the department 17 18 on the number of aerobic treatment unit systems inspected and 19 serviced. The owner will allow the department to inspect 20 during reasonable hours each aerobic treatment unit system at least twice each year and annually collect and analyze 21 system-effluent samples for performance criteria established 22 by rule of the department. 23 24 Section 2. Paragraphs (c) and (i) of subsection (2) of 25 section 381.0066, Florida Statutes, are amended to read: 381.0066 Onsite sewage treatment and disposal systems; 26 27 fees.--28 (2) The minimum fees in the following fee schedule 29 apply until changed by rule by the department within the 30 following limits: 31

6

(c) Annual operating permit for aerobic treatment units or performance-based treatment systems, including quarterly evaluation, annual sampling, and laboratory analysis of effluent from aerobic treatment units: a fee of not less than \$150, or more than \$50 \$300. б (i) Aerobic treatment unit or performance-based treatment system maintenance entity permit: a fee of not less than \$25, or more than \$150, per year. Section 3. This act shall take effect July 1, 1999. ************************************* SENATE SUMMARY Requires the Department of Health to regulate maintenance entities for performance-based treatment systems and aerobic treatment unit systems. Reduces the annual operating permit fee for aerobic treatment units or performance-based treatment systems.
