(6) "Water resource development project" means a project eligible for funding pursuant to s. 259.105 that increases the amount of water available to meet the needs of natural systems and the citizens of the state by enhancing or restoring aquifer recharge, facilitating the capture and storage of excess flows in surface waters, or promoting reuse. The implementation of eligible projects under s. 259.105 includes land acquisition, land and water body restoration, aquifer storage and recovery facilities, surface water reservoirs, and other capital improvements. The term does not include construction of treatment, transmission, or distribution facilities unless such construction is a part of a water resource development project conducted with funds allocated pursuant to s. 259.105(3)(a).
