6 and standards for electronic data interchanges already in
7 process in this state and nationally, to evaluating and
8 recommending the feasibility and cost-effectiveness of various

5 provider community, carriers, the business community, and the
6 general public.

7 5. Structuring the data collection process to:

8 a. Incorporate safeguards to ensure that the health
9 care services utilization data collected is reviewed by
10 experienced, practicing physicians licensed to practice
11 medicine in this state;

12 b. Require that carrier customer satisfaction data
13 conclusions are validated by the agency;

14 c. Protect the confidentiality of medical information
15 to protect the patient's identity and to protect the privacy
