(1) HEALTH CARE LICENSING & REGULATION

I. SUMMARY:

This bill removes the requirement that licensed dentists appointed to the board of dentistry derive their principal income from direct patient care. The bill also removes the provision that prohibits a licensed dentist, who earns more than 5% of her or his income from a dental college or community college, from being appointed to the Board of Dentistry. It requires any member of the board affiliated with a dental college or community college to be in compliance with s. 455.531, F.S., which prohibits a board member from earning her or his principal source of income from any medical, dental, or community college.

This bill has no significant fiscal impact on state or local revenues.

For any principle that received a "no" above, please explain:

B. PRESENT SITUATION:

Section 466.04, F.S., requires the Board of Dentistry to consist of 11 members. Two members must be licensed dental hygienists, two members must be lay persons who have never been licensed dentists or dental hygienists, and the remaining seven must be licensed dentists actively engaged in the clinical practice of dentistry and whose principal source of income is derived from direct patient care.

Any member of the board who is connected with a dental college or community college cannot derive more than 5% of her or his income from that college.

According to the Florida Dental Association, many dentists who are actively involved in the clinical practice of dentistry derive their principal incomes from other investments, not from direct patient care. Current law precludes these individuals from becoming board members.

C. EFFECT OF PROPOSED CHANGES:

This bill requires that dentists who qualify to sit on the board must be actively engaged in the clinical practice of dentistry. It removes any restrictions on how they derive their income, unless they are affiliated with a dental college or community college. If a dentist is connected with a dental college or community college, he must be in compliance with s. 455.531, F.S., which prohibits a board member from earning his principal source of income from any medical, dental, or community college.

D. SECTION-BY-SECTION ANALYSIS:

Section 1. Amends s. 466.04, F.S., to revise the qualifications for membership on the Board of Dentistry.

Section 2. Provides that the changes in the bill apply to appointments to the Board of Dentistry made on or after the effective date of the bill.

Section 3. Provides an effective date of July 1, 2000.

V. COMMENTS:

A. CONSTITUTIONAL ISSUES:

None.

B. RULE-MAKING AUTHORITY:

This bill does not grant any new rule making authority.

C. OTHER COMMENTS:

The Florida Dental Association and the Florida Board of Dentistry both support this legislation. One concern shared by both organizations that is addressed by this bill is the requirement that an appointee's primary income be derived from direct patient care. They feel that this may preclude qualified candidates whose primary source of income is from some other means, such as investments rather than direct patient care, from being considered for appointment.
