Representative Attkisson offered the following:

Amendment

Between line(s) 55 and 56, insert:

(4) If it is determined by the officer or agency responsible for distributing federal funds to a political subdivision that compliance with this act would prevent receipt of those federal funds, or would otherwise be inconsistent with federal requirements pertaining to such funds, then this act shall not apply, but only to the extent necessary to allow receipt of the federal funds or to eliminate the inconsistency with such federal requirements.

Section 2. This act shall not prohibit a federally authorized and recognized tribal government from establishing a minimum wage in excess of the federal minimum wage for natural persons employed within any territory over which the tribe has jurisdiction.
