29 Section 6. Florida Center for Universal Research to
30 Eradicate Disease.--

31

1 (1) The Legislature finds that an estimated 128
2 million Americans suffer from acute, chronic, and degenerative
3 diseases and that biomedical research is the key to finding
4 cures for these diseases that negatively affect all
5 Floridians. The Legislature further finds that, while there is
6 much research being conducted throughout this state and
7 throughout the world, there is a lack of coordination of
8 efforts among researchers. The Legislature, therefore, finds
9 that there is a significant need for a coordinated effort if
10 the goal of curing disease is to be achieved. Moreover, the
11 Legislature finds that the biomedical technology sector meets
12 the criteria of a high-impact sector, pursuant to section
13 288.108, Florida Statutes, having a high importance to this
14 state's economy with a significant potential for growth and
15 contribution to our universities and quality of life.

16 (2) It is the intent of the Legislature that Florida
17 strive to become the nation's leader in biomedical research
18 and commit itself to being the state to find cures for the
19 most deadly and widespread diseases. It is further the intent
20 of the Legislature that there be a coordinated effort among
21 the state's public and private universities and the biomedical
22 industry to discover such cures. Moreover, it is the intent of
23 the Legislature to expand the state economy by attracting
24 biomedical researchers and research companies to this state.

25 (3) There is established within the Department of
26 Health the Florida Center for Universal Research to Eradicate
27 Disease, which shall be known as "CURED."

28 (a) The purpose of the center is to coordinate,
29 improve, expand, and monitor all biomedical research programs
30 within the state, facilitate funding opportunities, and foster
31

1 improved technology transfer of research findings into
2 clinical trials and widespread public use.

3 (b) The goal of the center is to find cures for
4 diseases such as cancer, heart disease, lung disease,
5 diabetes, autoimmune disorders, and neurological disorders,
6 including Alzheimer's disease, epilepsy, and Parkinson's
7 disease.

8 (c) The center shall hold an annual biomedical
9 technology summit in Florida to which biomedical researchers,
10 biomedical technology companies, business incubators,
11 pharmaceutical manufacturers, and others around the nation and
12 world are invited to share biomedical research findings in
13 order to expedite the discovery of cures. Summit attendees
14 shall cover the costs of such attendance or obtain sponsorship
15 for such attendance.

16 (d) The center shall encourage clinical trials in this
17 state on research that holds promise of curing a disease or
18 condition. The center shall facilitate partnerships between
19 researchers, treating physicians, and community hospitals for
20 the purpose of sharing new techniques and new research
21 findings, as well as coordinating voluntary donations to
22 ensure an adequate supply of adult stem cells, placentas, or
23 cord blood.

24 (e) The center shall facilitate the formation of
25 partnerships between researchers in this state and
26 institutions in other states and countries where research with
27 rare plants or animals could lead to cures.

28 (f) The center shall encourage agricultural colleges
29 and agricultural businesses in this state to be active in the
30 search for cures and in providing information to the public
31 about disease prevention.

1 (g) The center shall facilitate partnerships among
2 researchers working to cure all types of diseases, including
3 those that are prevalent in developed countries and those that
4 occur mainly in developing countries.

5 (h) The center shall also encourage the discovery and
6 production in Florida of vaccines that prevent disease.

7 (i) The center shall monitor the supply and demand
8 needs of researchers relating to stem cell research and other
9 types of human tissue research. If the center determines that
10 there is a need for increased donation of human tissue, it
11 shall notify hospitals licensed pursuant to chapter 395,
12 Florida Statutes, which have entered into partnership
13 agreements with research institutes conducting stem cell
14 research located in the same geographic region as the
15 researchers demanding the stem cells or other tissues. Such
16 hospitals shall implement programs that encourage voluntary
17 donations of cord blood or other needed adult tissue.

18 (j) The center shall be funded through private, state,
19 and federal sources.

20 (k) The center shall serve as a registry of all known
21 opportunities for biomedical grants and may assist any public
22 or private biomedical research program in this state in
23 preparing grant requests.

24 (l) The center shall maintain a website with links to
25 peer-reviewed biomedical research. The website shall also
26 contain a list of all known biomedical research being
27 conducted in Florida and shall facilitate communication among
28 researchers and other interested parties.

29 (m) The center shall submit an annual report to the
30 Governor, the President of the Senate, and the Speaker of the
31 House of Representatives no later than January 15 which

1 contains recommendations for legislative change necessary to
2 foster a positive climate for biomedical research in this
3 state.
