FULL ANALYSIS

I. SUBSTANTIVE ANALYSIS

A. HOUSE PRINCIPLES ANALYSIS:

Provides limited government— The bill expands optional Medicaid services by providing adult vision services.

B. EFFECT OF PROPOSED CHANGES:

The Adult Dental, Visual and Hearing services program was eliminated, effective July 1, 2002, in the 2001 Special Session "C" (chapter 2001-377, Laws of Florida). The 2002 Legislature restored the hearing and vision services with nonrecurring funds prior to the elimination of the services on July 1, 2002, and funded emergency dental services for adults. The 2003 Legislature did not continue the funding for adult vision and hearing services so that they were eliminated effective July 1, 2003. Adult dental (dentures) services were restored effective January 1, 2005.

Florida's Medicaid Program currently provides, under optional Medicaid services, reimbursement for visual services rendered by licensed, Medicaid participating ophthalmologists, optometrists and opticians. Medicaid reimbursable services include visual examinations, refractions, eyeglasses and eyeglass repairs for children less than 21 years of age. Services for recipients age 21 and older are limited to prosthetic eyes and specialized contact lenses. There is a \$2 recipient co-payment for optometric services, per provider, per day, unless the recipient is exempt.

Section 409.906, Florida Statutes, provides the framework for the Agency for Health Care Administration to provide optional Medicaid services. This bill amends section 409.906, Florida Statutes, to provide adult vision services to approximately 675,000 adult Medicaid recipients.

An appropriation of \$2,399,934 from the General Revenue Fund, \$3,437,897 from the Medical Care Trust Fund, and \$190,394 from the Refugee Assistance Trust Fund is made to the Agency for Health Care Administration for the 2005-2006 fiscal year to provide adult vision services to Medicaid recipients. Vision services include two pair of eyeglasses per recipient per year, as well as necessary eyeglass repairs. Contact lenses are provided to recipients who have unilateral aphakia or bilateral aphakia.
