certifications as necessary to assure the adequacy of the design
and construction of permitted projects.

789 The department shall limit the construction of (e) structures which interfere with public access along the beach. 790 791 However, the department may require, as a condition to granting permits, the provision of alternative access when interference 792 793 with public access along the beach is unavoidable. The width of 794 such alternate access may not be required to exceed the width of 795 the access that will be obstructed as a result of the permit 796 being granted.

797 The department may, as a condition to the granting of (f) 798 a permit under this section, require mitigation, financial, or 799 other assurances acceptable to the department as may be 800 necessary to assure performance of conditions of a permit or 801 enter into contractual agreements to best assure compliance with 802 any permit conditions. The procedures for determining such 819 820 erosion shall be established by rule. In determining the area 821 which will be seaward of the seasonal high-water line in 30 822 years, the department shall not include any areas landward of a 823 coastal construction control line.

824 In determining the land areas which will be below the (d) 825 seasonal high-water line within 30 years after the permit application date, the department shall consider the impact on 826 827 the erosion rates of an existing beach nourishment or restoration project or of a beach nourishment or restoration 828 829 project for which all funding arrangements have been made and all permits have been issued at the time the application is 830 831 submitted. Alternatively, the department may also, at its 892 discretion, issue a permit for a more landward relocation or 893 rebuilding of a damaged or existing structure if such relocation 894 or rebuilding would not cause further harm to the beach-dune 895 system, and if, in the case of rebuilding, such rebuilding 896 897 complies with the provisions of subsection $(4)\frac{(5)}{(5)}$, and otherwise 898 complies with the provisions of this subsection.

(b) Under no circumstances shall the department permit
such repairs or rebuilding that expand the capacity of the

2116 The Legislature recognizes and affirms the division of (4)2117 responsibilities between the department and the water management districts as set forth in ss. management district and other agencies having applicable 2133 regulatory jurisdiction, shall be responsible for determining 2134 the permittee's compliance with conditions of certification 2135 which were based upon the nonprocedural requirements of part IV of this chapter. The Legislature authorizes the water management 2136 districts and the department to modify the division of 2137 responsibilities referenced in this section and enter into 2138 further interagency agreements by rulemaking, including 2139 2140 incorporation by reference, pursuant to chapter 120, to provide 2141 for greater efficiency and to avoid duplication in the 2142 administration of part IV of this chapter by designating certain activities which will be regulated by either the water 2143 management districts or the department. In developing such 2144 2145 interagency agreements, the water management districts and the department should take into consideration the technical and 2146 2147 fiscal ability of each water management district to implement 2148 all or some of the provisions of part IV of this chapter. 2149 Nothing herein rescinds or restricts the authority of the 2150 districts to regulate silviculture and agriculture pursuant to 2151 part IV of this chapter or s. 403.927. 2164 373.1963 Assistance to West Coast Regional Water Supply 2165 Authority.--

It is the intent of the Legislature to authorize the 2166 (1)implementation of changes in governance recommended by the West 2167 2168 Coast Regional Water Supply Authority in its reports to the 2169 Legislature dated February 1, 1997, and January 5, 1998. The 2170 authority and its member governments may reconstitute the authority's governance and rename the authority under a 2171 2172 voluntary interlocal agreement with a term of not less than 20 2173 years. The interlocal agreement must comply with this subsection as follows: 2174

(f) Upon execution of the voluntary interlocal agreement 2175 2176 provided for herein, the authority shall jointly develop with the Southwest Florida Water Management District alternative 2177 sources of potable water and transmission pipelines to 2178 2179 interconnect regionally significant water supply sources and 2180 facilities of the authority in amounts sufficient to meet the needs of all member governments for a period of at least 20 2181 years and for natural systems. Nothing herein, however, shall 2182 2183 preclude the authority and its member governments from 2184 developing traditional water sources pursuant to the voluntary 2185 interlocal agreement. Development and construction costs for 2186 alternative source facilities, which may include a desalination facility and significant regional interconnects, must be borne 2187

as mutually agreed to by both the authority and the Southwest Florida Water Management District. Nothing herein shall preclude authority or district cost sharing with private entities for the construction or ownership of alternative source facilities. By December 31, 1997, the authority and the Southwest Florida Water Management District shall:

2194 1. Enter into a mutually acceptable agreement detailing 2195 the development and implementation of directives contained in 2196 this paragraph; or

2197 2. Jointly prepare and submit to the President of the 2198 Senate and the Speaker of the House of Representatives a report 2199 describing the progress made and impediments encountered in 2200 their attempts to implement the water resource development and 2201 water supply development directives contained in this paragraph. 2202

Nothing in this section shall be construed to modify the rights or responsibilities of the authority or its member governments, except as otherwise provided herein, or of the Southwest Florida Water Management District or the department pursuant to this chapter or chapter 403 and as otherwise set forth by statutes.

2208 Section 71. Subsection (14) of section 376.121, Florida 2209 Statutes, is amended to read:

2210 376.121 Liability for damage to natural resources.--The 2211 Legislature finds that extensive damage to the state's natural 2212 resources is the likely result of a pollutant discharge and that 2213 it is essential that the state adequately assess and recover the 2214 cost of such damage from responsible parties. It is the state's 2215 goal to recover the costs of restoration from the responsible

parties and to restore damaged natural resources to their 2216 2217 predischarge condition. In many instances, however, restoration 2218 is not technically feasible. In such instances, the state has 2219 the responsibility to its citizens to recover the cost of all 2220 damage to natural resources. To ensure that the public does not bear a substantial loss as a result of the destruction of 2221 2222 natural resources, the procedures set out in this section shall 2223 be used to assess the cost of damage to such resources. Natural 2224 resources include coastal waters, wetlands, estuaries, tidal 2225 flats, beaches, lands adjoining the seacoasts of the state, and 2226 all living things except human beings. The Legislature recognizes the difficulty historically encountered in 2227 2228 calculating the value of damaged natural resources. The value of 2229 certain qualities of the state's natural resources is not 2230 readily quantifiable, yet the resources and their qualities have 2231 an intrinsic value to the residents of the state, and any damage 2232 to natural resources and their qualities should not be dismissed 2233 as nonrecoverable merely because of the difficulty in 2234 quantifying their value. In order to avoid unnecessary 2235 speculation and expenditure of limited resources to determine 2236 these values, the Legislature hereby establishes a schedule for compensation for damage to the state's natural resources and the 2237 quality of said resources. 2238

(14) The department must review the amount of compensation assessed pursuant to the damage assessment formula established in this section and report its findings to the 1995 Legislature. Thereafter, the department must conduct such a review and report its findings to the Legislature biennially.

6535 309.01 Deposit of material in tidewater regulated .--6536 (1)It is not lawful for any person to discharge or cause 6537 to be discharged or deposit or cause to be deposited, in the tide or salt waters of any bay, port, harbor, or river of this 6538 state, any ballast or material of any kind other than clear 6539 stone or rock, free from gravel or pebbles, which said clear 6540 stone or rock shall be deposited or discharged only in the 6541 construction of enclosures in connection with wharves, piers, 6542 6543 quays, jetties, or in the construction of permanent bulkheads 6544 connecting the solid and permanent portion of wharves. It is 6545 lawful to construct three characters of bulkheads for retention of material in solid wharves. First, clear stone or rock 6546 6547 enclosures, or bulkheads, may be built upon all sides to a 6548 height not less than 21/2 feet above high watermark; and after 6549 the enclosures have been made so solid, tight, and permanent as 6550 to prevent any sand, mud, gravel, or other material that may be 6551 discharged or deposited in them from drifting or escaping 6552 through such enclosures, any kind of ballast may be discharged 6553 or deposited within the enclosures. The enclosures may be 6554 constructed of wood, stone, and rock combined, the stone and 6555 rocks to be placed on the outside of the wood to a height not less at any point than 21/2 feet above high watermark. Second, a 6556 6557 bulkhead may be built by a permanent wharf consisting of 6558 thoroughly creosoted piles not less than 12 inches in diameter 6559 at the butt end, to be driven close together and to be capped with timber not less than 10 or 14 inches drift, bolted to each 6560 6561 pile, and one or more longitudinal stringers to be placed on the 6562 outside of the bulkhead and securely anchored by means of iron

6563 rods to piles driven within the bulkheads, clear rock to be on 6564 the inside of the bulkhead, to a height of not less than 21/26565 feet above high water; and after this is done, ballast or other 6566 material may be deposited within the permanent enclosure so 6567 constructed. Third, a bulkhead may be constructed to consist of creosoted piles, as described herein, driven not exceeding 4 6568 feet apart from center to center, inside of which two or more 6569 6570 longitudinal stringers may be placed and securely bolted to the 6571 piles. Inside of these longitudinal pieces, two thicknesses of 6572 creosoted sheet piling are to be driven, each course of the 6573 sheet piling to make a joint with the other so as to form an 6574 impenetrable wharf; and within this permanent bulkhead so constructed, any ballast or other material may be deposited. No 6575 6576 such enclosure, pier, quay, or jetty shall be begun until the 6577 point whereat it is to be built shall have been connected by a 6578 substantial wharf with a shore or with a permanent wharf; except 6579 that the owners of wharves may at any time, with the consent of the Board of Pilot Commissioners of the Division of Professions 6580 of the Department of Business and Professional Regulation, build 6581 6582 wharves of clear stone or rock, or creosoted walls as 6583 hereinafter provided, on each side of their wharves from the 6584 shore to a point at which the water is not more than 15 feet 6585 deep, and when such walls have attained a height of 21/2 feet 6586 above high watermark and have been securely closed at the 6587 deepwater end by stone or creosoted walls of the same height, 6588 any kind of ballast may be deposited in them. Nothing contained 6589 in this section shall interfere with any rights or privileges 6590 now enjoyed by riparian owners. While this section empowers
